## About this report

# About this report

(2: 3-1, 2-4, 3-2)

The purpose of this Sustainability Report (hereinafter, SR) is to present the progress and achievements of Grupo EULEN in terms of social, environmental and governance sustainability during the 2022 financial year, and to respond to the expectations of information on the relevant issues of our stakeholders, identified in the materiality assessment.

This report will highlight the main actions and measures implemented to reduce our environmental impact, promote gender equality, diversity and inclusion, ensure fair and safe

working conditions for our employees, and ensure transparency and accountability in our corporate governance practices.

Grupo EULEN has been a member of the United Nations Global Compact since 2002. The SR is a Progress Report on the 10 principles and 17 Sustainable Development Goals (SDGs) of the Global Compact.

Each year we reaffirm our commitment to the 10 Universal Principles of the United Nations Global Compact in the field of Human Rights, labor

standards, the environment and the fight against corruption.

Most of the performance indicators included in this Report are global, covering all countries where the group operates.

In this sense, to make the report easier to read and understand, the scope corresponding to each item of data is indicated in the corresponding section, table or graph, as are the necessary reformulations of information from previous years.

PRINCIPLES UNDERLYING GRUPO EULEN's SUSTAINABILITY REPORT

# Message from the President

Dear friends:

As you all know, 2022 has been a year of special relevance for Grupo EULEN due to the celebration of our 60th anniversary, in which we have carried out outstanding commemorative events such as the exhibition “Daughters of the Nile: women and society in ancient Egypt”. It has also been a year for creating projects designed with the same vocation of service to customers and the society we live in, that we had when we began our journey.

Last year, we launched the Sustainability Master Plan 2022-2025 we are currently immersed in, and we have achieved remarkable progress in this area. I would like to begin by highlighting those advances that most directly concern our human capital, which, after all, is the backbone of our business and, I dare say, of any successful project.

Grupo EULEN has always been clear from the outset that people are the driving force behind the company’s sustained growth. For this reason, and with more than 74,000 employees currently making up the company, our over-riding philosophy is one which guarantees essential goals such as human rights, labor standards, the environment and the fight against corruption.

Likewise, our company, in addition to maintaining high ratios in gender diversity, where 54% of our employees are women, or in generational diversity, with 52% of the workforce being under 30 or over 50 years of age, has far exceeded another of its major goals, that of offering an opportunity to those who find it most difficult to enter the labor market.

In this way, in our efforts to incorporate groups at risk of social exclusion into our company, we have managed to increase the number compared to the previous year. This amount increases to 7.58% in the case of people with some kind of disability. Meanwhile, we continue to work on other essential factors to improve work-life balance, knowledge management and the commitment to talent and its diversity.

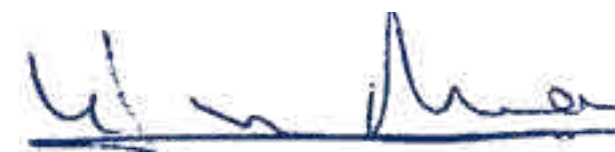

Investing in our environment is investing in the future. For this reason, in 2022 the company allocated a budget of almost 3.1 million Euros to environmental risk prevention. Along the same lines, and with regard to the company’s commitment to environmental matters, I would like to highlight the effort that we, as a company, are making to promote the circular economy. In this sense, we never cease in our efforts to work on the creation of solutions aimed at achieving a zero waste business model, both in our internal processes and in those inherent to the services we provide.

Furthermore, and in parallel to the goal of climate neutrality by the year 2050, we continue to implement actions aimed at decarbonization that fulfill the dual objective of reducing our CO2 emissions into the atmosphere and offsetting those that we have been unable to neutralize. In this chapter, Grupo EULEN has managed to offset all scope 1 and 2 CO2 emissions at the corporate level.

Continuing to impact the social development of the communities where we operate is one of our maxims. We have undoubtedly become an economic and social agent of change with a tax contribution in 2022 of 327 million Euros and a social contribution of 348 million Euros.

And above all else, at Grupo EULEN, we are proud of our contribution to the community. Last year, the Group allocated a total of 855,603 Euros to more than 550 social initiatives in collaboration with 485 organizations actively involved in different fields including aid to children, the elderly or vulnerable groups, the promotion of culture, education, sports and the protection of our environment.

Finally, and highlighting once again our company’s human capital, I would like to emphasize the effort and professionalism that each and every one of us puts into our daily work. Both factors allow us to offer a quality service highly valued by our customers. I would like to take this opportunity to thank them for their contribution, as I believe that they are the driving force behind the growth of our company.

**María José Álvarez Mezquíriz**  
Executive President of Grupo EULEN

**Grupo EULEN has always been clear from the outset that people are the driving force behind the company’s sustained growth.**

## Message from the CEO

# Message from the CEO

Dear all,

The year 2022 has once again highlighted the great potential of Grupo EULEN. It has been a year of celebration for us for our 60th anniversary, but it has also been a year of success, work and the achievement of goals both in the business area, exceeding 1,675 million Euros in sales and more than 74,000 employees worldwide, as well as in the social area and responsibility towards our environment.

In accordance with our Strategic Plan, we have met the two KPI's linked to our financial stability. The first refers to the reduction of the Group's carbon footprint, which has been 5.42% compared to the previous year; and the second concerns disability, where EULEN has achieved a 7.58% increase in the number of people hired with some type of disability compared to 2021.

But I would also like to emphasize other actions that support these and other goals inherent to environmental sustainability. In this regard, we have achieved several milestones in 2022. Among them, I would like to highlight that our company has become the first large company in Spain to obtain the EU Ecolabel, for the interior cleaning services we offer through EULEN Limpieza Circular.

Reiterating our commitment to the environment, we have made great strides in sustainable mobility. The number of efficient vehicles (electric, hybrid, autogas or LPG) in the company has doubled from 198 in 2021 to 400 in 2022. A milestone that, together with the investment in sustainable machinery, which accounted for 56% of total investments in 2022, contributes to exponential progress in the decarbonization goals we have set ourselves.

In terms of circular economy, the Group's main strategy is to achieve 'zero waste' through waste prevention and recovery. Last year, 99.53% of waste generated was sent for recycling. At the same time, the company continues to make progress in digitalization to optimize processes and improve efficiency.

Adapting to the needs of our customers at all times is undoubtedly an essential part of the key to our success. We are able to offer customized solutions with high quality standards while maintaining attributes that are essential in this day and age, such as efficiency and sustainability. Today, however, the achievement of this quality offer is inconceivable

without the technological aspect. For this reason, I would like to make a special mention of the specific effort that our company has made in technological innovation in 2022.

Looking to the future, we must focus on continuous improvement in supply chain management along with the implementation of due diligence mechanisms. These are just some of the challenges we have set ourselves for this year; but in this regard I believe it is only fair to highlight the commitment we have made to local trade, with 99.80% of local suppliers, of which 1,518 are newly approved.

At Grupo EULEN, in addition to maintaining a policy of equal opportunities among our professionals, we are committed to talent, through mechanisms like training that are so essential to us, and we encourage the professional growth of each of our employees through internal promotion programs.

In response to the needs that arise in the area of talent and training, we have invested more than 677,000 hours of in-house training in areas including environmental awareness, ethics and human rights, crime prevention and data protection.

Likewise, digital transformation and research are areas that require continuous training. For this reason, at EULEN Corporate University we continue to be immersed in the development of academic projects aimed at covering these areas. To complete the implementation of this training, we have carried out mentoring processes and other programs aimed at high-performance teams.

Finally, for 2023 we will continue to grow both our turnover and the creation of stable employment in our line of work consisting of balancing results and people.

**Juan Ramón Pérez Sancho**  
CEO

**Adapting to the needs of our customers at all times is undoubtedly an essential part of the key to our success.**

# Our brands

## Commercial brands

Grupo EULEN's activity is carried out through four business models that cover the company's different services.

### EULEN S.A.

EULEN, S.A. is Spain's leader in providing services for companies with the aim of offering society innovative services that entail useful, quality and more efficient solutions.

The Group specializes in cleaning, FSM (Facility Services & Management), auxiliary services (logistics, general and telemarketing), comprehensive maintenance and environmental services.

### EULEN Seguridad

EULEN Seguridad, a leading company in the sector, has been serving its customers for almost 50 years with the same expertise as when it started its operations. As an innovative and flexible company, it can adapt to new scenarios and risks, while remaining committed to achieving excellence in the provision of services.

EULEN Seguridad is specialised in surveillance, security systems solutions, consultancy, cybersecurity, Intelligence Unit, air surveillance, cash transport, Comprehensive Security Control Centers, critical infrastructure protection and integrated security.

### EULEN Sociosanitarios

EULEN Sociosanitarios is a company specialized in providing social, healthcare and educational services to both the public administration and private customers.

EULEN Sociosanitarios, with more than 30 years' experience, currently covers more than 100,000 users in Spain in home help services, Telecare, healthcare services, residential centers, day centers, centers for battered women, nursery schools, services for people with intellectual disabilities, centers for people with serious mental illnesses, etc.

### EULEN Flexiplán

EULEN Flexiplán is the Grupo EULEN division specialized in people management, with 3 sub-brands: EULEN Flexiplán Trabajo Temporal, EULEN Flexiplán Selección and EULEN Flexiplán Formación.

EULEN Flexiplán, dedicated to HR and employment solutions, carries out activities in the area of temporary employment, staff selection, outplacement, employee development and training programs and a placement agency that collaborates with the Public Employment Services.

### EULEN Aviation

EULEN Aviation is a pioneer and leader in providing a broad spectrum of ground services at airports across the United States. It offers a full range of ground handling and passenger support services for domestic and international carriers.

Its reputation for providing quality, cost-effective services is recognized within the aviation industry in the United States. It currently serves most major airlines at major airports across the United States.

# 05

## Understanding Grupo EULEN

A business model with differential value

- Description of the business model
- Customer satisfaction: our main goal
- R&D&I Service engineering: a driver of innovation
- Sustainability accreditations and awards
- Stakeholder relations
- Contribution to sustainable development

# A business model with differential value

## Description of the business model

Grupo EULEN is committed to continuing to maintain its leadership position, focusing on market trends: sustainability, technology, innovation and digitalization; but at the same time applying its differential value, its values: specialization, experience, know-how, responsibility, commitment, ethics and humanity.

Below is a brief description of the company's main activities:

Most notably, Facility Services & Management (FS&M), private security services, social and healthcare services, global HR management services, employment and temporary employment, as well as aviation services.

Grupo EULEN is committed to a single Facility Services & Management model, providing a global vision that integrates, implements and manages all the services that a company or public administration may need, with innovative tailor-made solutions that achieve cost savings and create optimal working conditions.

With an extensive portfolio, the services provided include the operational management of real estate, space management, energy efficiency and industrial maintenance of facilities and soft services, including cleaning, reception, telephone and back office assistance.

In recent years, EULEN FS&FM has made significant commercial efforts, showing customers the highly specialized services they offer.

### Security Services

In an environment with new and ever-changing threats, EULEN Seguridad has extensive experience in services aimed at protecting both tangible and intangible assets, as well as processes that guarantee the continuity of customers' business operations.

The company is a leader in the management of comprehensive security solutions, with a clear commitment to technological security combined with traditional physical security services.

Our most notable areas of activity are conventional surveillance, security service maintenance and solutions, consulting services, cybersecurity, protection of critical infrastructures, air surveillance and security operations and logistics services.

### Social and Healthcare Services

With more than 30 years' experience, EULEN Sociosanitarios is a leader in the specialised

management of social, educational and health services.

Its mission is to educate, support, assist and care for people, respecting ethical principles, to improve their quality of life and life plan. Its range of services, aimed at public and private customers, is oriented towards people and society.

This business area continues to exist thanks to its twin pillars of specialization and diversity. It is therefore committed to the constant innovation, growth and development of its professionals.

### HR management services, employment and temporary employment services

EULEN Flexiplán has wide experience in the management of human resources and the search for talent. Its success is based on the identification of the strategic competencies required by each customer and market.

EULEN Flexiplán responds to companies' needs in relation to worker availability, qualified staff recruitment processes, staff training, HR consulting and outsourcing processes within the area of Human Resources.

### Services for sustainability

Grupo EULEN, in line with its philosophy of being a company committed to its workforce and society, has launched services that help its "client" companies to be more sustainable.

In this context, the company designs services with a sustainable approach right from their outset, to avoid harmful practices, oriented to the three aspects of sustainability:

- ensuring economic viability, with solvency and efficient management of its resources;

- caring for the environment, with concern and commitment to the fight against climate change;
- and social well-being, ensuring people's health, the integration of those at risk of exclusion, gender equality and employment stability.

We highlight sustainable services including waste management and cleaning, the installation of forest green filters, active forests, electric mobility, the installation and maintenance of solar panels, biomass boilers and new workspaces.

### Aviation

Grupo EULEN in the United States has a pioneering and leading business model in the provision of a wide range of ground services at airports across the USA.

Customers include major airlines to which it provides ramp, cabin, passenger, wheelchair and baggage handling services, VIP lounges, cleaning and cargo services at 10 airports, in addition to airport security services through security guards and supervisory staff, with one of the most comprehensive programs in the security services industry.

## Customer satisfaction: our main goal

Grupo EULEN aims to continue to be the first choice for its public and private sector customers by providing excellent and innovative services that exceed their needs and expectations.

Our goal is to be recognized as a company that generates trust in society, with transparency and honesty as key values.

Given that service quality is a strategic pillar of Grupo EULEN, customer satisfaction is a key indicator for the company, as it directly influences the evolution of the business and the continuity of the company over time.

The Group's Customer Satisfaction Index (CSI) for 2022 was 7.70. This rating continues to be very high, given that it is the average rating of the Group's activities in 10 countries (Spain, Portugal, Mexico, Peru, Chile, Colombia, Dominican Republic, Panama, USA and Costa Rica), as shown in the table below:

### CUSTOMER SATISFACTION INDEX (CSI):

## R&D&I Service engineering: a “driver” of innovation

Grupo EULEN is immersed in a continuous process of exploration and development of new services, with the aim of meeting the growing needs of individuals, companies and public bodies.

The company proposes service models with potential, called Designed Services, specifically created to provide more efficient, high-quality, useful solutions. Service design is the first application of “service engineering” that started to be addressed as a key reference by R&D&I at the end of 2015.

In-house methodologies and tools created by the R&D&I department have been used for their development, including its representation of services model (MRS), or the technological business challenge (RTN), which is the seed of more technological and efficient services. It is worth highlighting the specific effort made in 2022

in terms of technological innovation. ‘Designed Services’ require continuous technical specification to maintain our high quality standards in an efficient and sustainable manner.

Equally aware of the digital transformation that society, work and people are undergoing, we redirect all our technological knowledge and experience towards highly efficient and transformative solutions that continuously digitalize our designed services.

We use technology to manage technology, and therefore the Technology Sphere® is a dynamic platform used by thousands of people across our organization through which knowledge flows transversally. We learn, and the Organization also ultimately learns.

### Major projects

#### Circular Comprehensive Maintenance (MIC)

To evolve from conventional infrastructure maintenance to integrated maintenance focused on energy. Comprehensive maintenance of production, distribution and energy consuming equipment, monitored with metrics and operated on performance protocols, certified and audited (ISO 50001, carbon footprint calculation, etc.).

#### ‘Concilia’ Work-Life Balance Services

Specialized social and family counseling and management service for large companies by telematic means (web, mobile or e-mail, 24h contact center) and on site at the customer's own work center. This includes the following services: legal and tax advice, legal advice, financial advice, management, education and training advice, domestic staff selection, domestic service labor advice, information and support service for leisure and free time procedures, consumer advice, social advice on family procedures, advice on ethical issues and comprehensive assistance for life situations.

#### Comprehensive management of exhibition projects

Design, planning, production, maintenance, operation and commercialization of exhibition projects. The manifestation of Art can also be sustainable and efficient. The comprehensive management of exhibition spaces, such as museums, galleries, traveling exhibitions, etc. brings quality to the artistic experience and efficiency and sustainability to the process.

Certificates and external accreditations

	ECOVADIS	We have participated in the Ecovadis global sustainability rating platform since 2019. In the 2021 data assessment, we obtained the Silver medal in recognition of our achievements in sustainability. We also obtained a Carbon Management Level rating: Advanced.	
	CDP	Since 2016 we have participated in the non-profit charity, CDP, which manages the global disclosure system for investors, companies, cities, states and regions to manage their CDP environmental impact.	
	BIOSPHERE	As a novelty, this year we participated in the new Biosphere Sustainable platform and methodology that evaluates the sustainability of companies in terms of compliance with the United Nations 2030 Agenda. During 2022, we obtained the certification with an optimal rating.	
	SEDEX	Since 2021, we have participated in the survey conducted by the SEDEX platform in order to store, analyze, share and inform our stakeholders about the sustainable practices carried out in our supply chain. In the evaluation carried out in 2022, we obtained a score of 4.4 out of 5, with the environment section obtaining a notable 4.9 out of 5.	
	ACHILLES	Grupo EULEN has been audited and evaluated by Achilles since 2019 with the aim of improving our supplier management and optimizing processes related to purchasing and procurement of products and resources. During the 2022 evaluation, EULEN, S.A. obtained a platinum certification in sustainability with an ESG score of A+.

# List of our stakeholders

(102-40, 102-42, 102-43)

We must take our stakeholders into account, in order to advance in the sustainable creation of value and face the challenges and opportunities of the environment in which we operate. Meeting their needs, expectations and demands is key to having a positive impact on our environment and to advancing our company's objectives, such as promoting Human Rights or achieving the United Nations Sustainable Development Goals (SDGs).

Our stakeholder relations are based on the principles contained in various global and specific policies, such as the Code of Ethics, the Code of Values, the Integrated Management Policy (Environmental, Quality and Occupational Health and Safety Management) and the Standards for Suppliers, among others.

The common principles on which our relationship with all stakeholders is based are transparency and permanent dialogue, which are manifested in different strategies, goals and communication channels that are constantly being reviewed and updated.

SHAREHOLDER	<ul style="list-style-type: none"><li>- Annual accounts that include sustainability indexes.</li><li>- Satisfactory approval of AAs. In General Shareholders' Meeting.</li></ul>

# Contribution to sustainable development

For Grupo EULEN, sustainability is a priority aspect in the company's processes, and is part of both the company's culture and business processes.

We are convinced that the only way to achieve a successful and sustainable company over time is to grow and generate greater value without compromising our future generations.

We are also at a time of transformation of the current economic model towards a sustainable economic model. In this sense, we share with our customers the focus on the demand for new service solutions to advance this transformation.

Since 2002, Grupo EULEN has been a member of the United Nations Global Compact organization and, therefore, we are firmly committed to the 2030 Agenda and the SDGs for Sustainable Development.

Therefore, each of the actions and initiatives implemented by Grupo EULEN are aligned with and contribute to the achievement of one of the 17 SDGs.

Our commitment extends to all 17 SDGs, as they are all interrelated. However, we are aware that there are certain SDGs in which our contribution is greater and more relevant, due to the very nature of our business model and our activity. These include SDG 1 (End Poverty), SDG 3 (Health and Well-Being), SDG 4 (Quality Education), SDG 5 (Gender Equality), SDG 7 (Affordable and Clean Energy), SDG 8 (Decent Work and Economic Growth), SDG 10 (Reducing Inequalities), SDG 12 (Responsible Production and Consumption), SDG 13 (Climate Action) and SDG 17 (Partnerships to Achieve the Goals).

In this regard, we include information on the main indicators that reflect our contribution to the SDGs. These contents have been selected in accordance with the GRI Universal Standards 2021 and the principles of the United Nations Global Compact, as mentioned at the beginning of this Report.

## Main Grupo EULEN indicators and its contribution to the Sustainable Development Goals (SDGs)

The next 10 years have been defined as the decade of action to achieve the United Nations 2030 Agenda for Sustainable Development and its SDGs (Sustainable Development Goals), and each of the actions and initiatives implemented by Grupo EULEN are aligned with and contribute to the achievement of one of the 17 SDGs.

# Long-term vision with an integrated, sustainable model

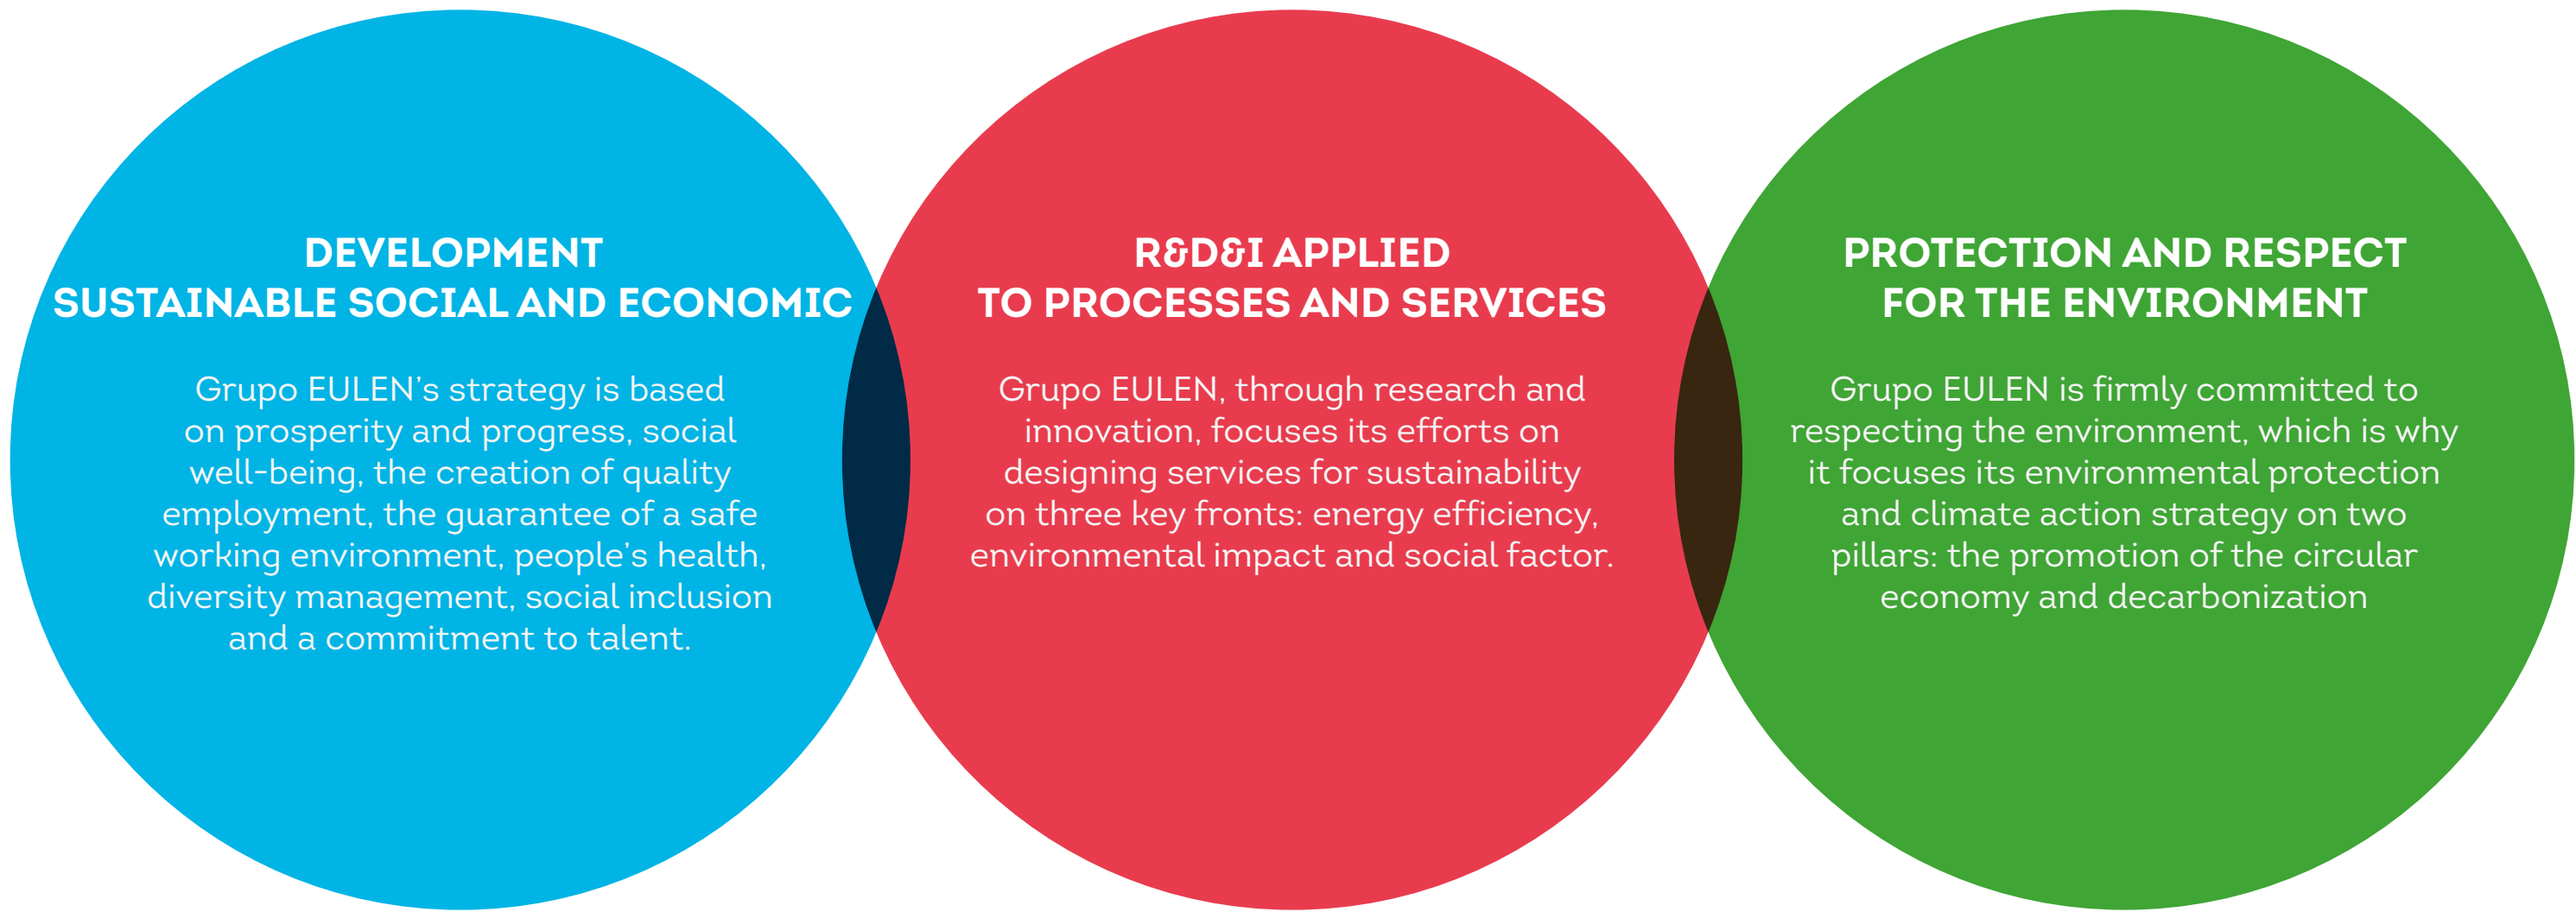

Grupo EULEN's goal is to be recognized as a company that generates trust in society, with transparency and honesty as key values. It is committed to sustainability, technology, innovation and digitalization; applying its differential value, its values: specialization, experience, know-how, responsibility, commitment, ethics and humanity.

In 2022, the company celebrated its 60th anniversary and, from the outset, Grupo EULEN has always been clear that the driving force behind the company's sustained growth is its people. With more than 74,000 employees, social responsibility has always been very present, guaranteeing essential issues such as human rights, labor standards, the environment and the fight against corruption.

Grupo EULEN's success is due to its focus on the customer, providing customized solutions and adapting to the needs of each customer. Through research and innovation, we focus our efforts on designing services for sustainability on three key fronts: energy efficiency, environmental impact and social factor.

Our Sustainability Roadmap sets out the milestones towards a circular economy model that contributes to mitigating the effects of climate change, from the awareness of our employees to the analysis of the complete life cycle of our products and services, measuring and pursuing the reduction of the environmental footprint, increasing the use of raw materials from responsible and well-managed sources, preserving biodiversity and complying with health and safety standards, all from our commitment to the respect and promotion of human and labor rights.

We are committed to further advancing our sustainability strategy and working closely with all stakeholders to achieve a more just, equitable and sustainable future.

# Sustainability governance

Sustainability governance is a fundamental pillar of the company's strategy, which seeks not only to be a profitable company, but also a socially and environmentally responsible one.

This was made clear with the approval, in 2022, by the company's Corporate Management Committee, of the Sustainability Master Plan 2022-2025, which provides continuity to the previous plan, 2019-2021, and puts into practice the company's commitment to sustainable development in its three main axes - economic, social and environmental.

The Plan is approved by the company's highest management body, the Corporate Management Committee, and one of the members of this Committee is the Director of the Corporate Area of Organization, Control and CSR, the area responsible for sustainability management in the company.

The company's Corporate CSR Department, which is part of the Organization, Control and CSR Area, is responsible for supervising and coordinating all activities related to sustainability in the company and for evaluating the company's environmental and social performance, as well as for establishing objectives and strategies for continuous improvement.

# Business ethics and transparency

The Group has a strong culture of ethics, integrity and honesty, and the identification and prevention of risks associated with possible situations of human rights violations, corruption, bribery or money laundering are matters of vital importance to the company.

The company has adopted a series of measures to ensure sustainable and responsible management in all areas of its operations. A series of policies, internal control mechanisms, communication channels and mandatory training.

1

Corporate policies

- Code of Ethics
- Criminal Compliance Policy
- Anti-corruption policy
- Information security policy
- Data protection policy

3

Communication Channels

- Internal whistleblowing channel
- Whistleblowing channel through Grupo EULEN's website

2

Internal control mechanisms

- Corporate Management Committee.
- Ethics committee
- Criminal risk map
- Crime Prevention System
- Crime Prevention Committee
- System for the prevention of money laundering and financing of terrorism

4

Stakeholder training

- Code of Ethics
- Crime prevention
- Information security
- Data protection
- Let's talk about equality
- Sustainable Development
- Environmental awareness

Reference frameworks used:

- United Nations Global Compact principles. 2030 Agenda.
- United Nations SDGs
- OECD
- United Nations Convention against Corruption

| 06 Strategy for sustainable development

(3-2)

CORPORATE POLICIES

**Code of Ethics:** establishes the principles and values that govern the conduct of its employees and managers in relation to sustainability and social responsibility. This code includes measures to prevent corruption and bribery, to respect human and labor rights, to protect the environment, and to promote transparency and accountability.

All Group employees are aware of and have consented to this. In this sense, any employee of the Group or any other stakeholder may report alleged breaches of the Code of Ethics that they detect in Group companies or among their employees. Therefore, suppliers, subcontractors and customers must also follow the principles of the Code of Ethics.

**Criminal compliance policy:** aims to promote and establish ethical behavior within the Group, based on common principles and values that seek to prevent and avoid any illicit behavior that may occur internally in the organization.

**Anti-corruption policy:** aims to prevent and identify behaviors that may result in criminal liability for the legal entity, especially for those crimes related to corruption.

**Information Security Policy:** the purpose of this policy is to define the lines of action for information security and to express the Management's express commitment to its application.

**Corporate Personal Data Protection Policy:** aims to guarantee and protect the privacy of individuals whose personal data is processed by Grupo EULEN companies.

COMMUNICATION CHANNEL

**Whistleblowing channel:** Grupo EULEN has a whistleblowing mailbox to confidentially report any actions that could breach the Group's code of ethics or any of the company's corporate policies.

In addition, the company takes the necessary measures to provide solutions to the various incidents recorded and prevent them from resulting in criminal liability for the company.

There is a whistleblowing mailbox on the Group's website, which gives other stakeholders the possibility to communicate any relevant information.

INTERNAL CONTROL MECHANISMS

**Corporate Management Committee:** This Committee has appropriate authority and independence, leading and committing itself to the Group's crime prevention system, allocating the necessary resources for its operation. Likewise, one of the main functions it performs is to carry out, at planned intervals, a review of the organization's criminal compliance management system.

**Ethics committee:** body responsible for ensuring compliance with the Code of Ethics. This committee is made up of the corporate Human Resources and Organization, Control and CSR Departments, the Management of the Legal Department in Spain, as well as a rotating position at the discretion of the Group's Management.

**Criminal risk map:** reflects the criminal risks to which the company is exposed. This map has been approved by the Crime Prevention Committee and is updated annually.

**Criminal Risk Report:** this report has identified the criminal risks faced by Grupo EULEN in its daily activities.

**Crime Prevention System:** Internal control system intended to mitigate the risk of crimes that may be committed both within the company and in its relations with third parties, which may result in criminal liability for the legal entity, as well as to promote a culture of compliance in the entity.

**Crime Prevention Committee:** this Committee is entrusted with the periodic supervision of the risk control and prevention systems established, so that these are identified, managed and made known internally, in an adequate manner for the prevention of same.

**System for the prevention of money laundering and financing of terrorism (BC/F/):** this is regulated on the basis of Instruction I-930/0000/0008 "Customer Admission Policy for the transport of funds".

**Contractual clauses for customers and subcontractors regarding ethical and crime prevention standards:** Grupo EULEN contracts include clauses requiring customers and suppliers/subcontractors to comply with all applicable regulations.

STAKEHOLDER TRAINING

There are different mandatory courses for staff, in all the regions in which the company operates, both face-to-face and online: Code of Ethics, Crime Prevention, Information Security, Data Protection, Let's talk about equality, environmental awareness and sustainable development.

# Materiality assessment

(3-3)

As a sign of our commitment to sustainability and using it as a strategic tool, we have updated our latest materiality assessment.

The goal of this assessment is to identify and prioritize the most relevant for the company, based on the analysis of the impacts that affect its environmental and socioeconomic circumstances. These issues have been classified according to the ESG (environmental, social and governance) perspective.

The analysis has been carried out using as a reference the Global Reporting Initiative (GRI) standard "GRI 3: Material Topics", and what is defined in the drafts of the ESRS (European Sustainability Reporting Standards) regarding the materiality assessment of companies.

This exercise lays the groundwork for a future dual materiality assessment, which will be addressed in future years, incorporating the financial perspective. An initial identification of Risks and Opportunities has also been carried out as proposed in the dual materiality methodology described in the ESRS.

The involvement in the analysis of the company's main stakeholders is proposed as a key part of a process that has been structured as follows:

## 1. SECTOR CONTEXT AND BUSINESS MODEL ANALYSIS

In the first stage of the work, a context analysis of the sector in which EULEN operates, and of the company's business model, was carried out. This enabled an **initial approximation of the most relevant impacts, risks and opportunities.**

Among the issues analyzed, the following stand out:

- Trends in the business model and sustainability, through the analysis of sectoral reports or other sources.
- Benchmarking of competitors in the sector.
- Prescriber analysis (MSCI, SASB, etc.)
- Internal meetings with those responsible for the company's most relevant business lines.

In order to achieve a complete identification of the company's impacts, considering the diversity of its activities, the focus has been placed on each of the business lines individually. Understanding the particularities of each of the company's activities has allowed for greater precision in the analysis. The areas analyzed are indicated below.

Healthcare services

Temporary Work

Environment

Facility Management

Maintenance

Cleaning

Auxiliary Services

Security

2. IDENTIFICATION OF MATERIAL IMPACTS AND TOPICS

In this stage of the work, internal meetings were held with the managers of each business line in order to correctly identify EULEN's main impacts. The result has been a list of 230 impacts, 82 risks and 25 opportunities among all areas, considering both positive and negative impacts, as well as current and potential.

Together with Grupo EULEN's CSR team, the Scope, Likelihood and Remediability of these impacts have been defined.

To complete the analysis and facilitate its understanding, the impacts have been classified by ESG topics, which in turn correspond to the 3 sustainability verticals: Environment, Social and Governance (ESG). These topics have been formulated taking into account the ESRS drafts and previous EULEN materialities.

ENVIRONMENTAL TOPICS (E)

Adaptation to climate change

Energy efficiency and reduction of emissions

Environmental pollution

Water management

Resource use and management

Waste management and Circular Economy

SOCIAL TOPICS (S)

Talent management and working conditions

Health and safety

Labor conditions of workers in the value chain

Equality, diversity and inclusion

Contribution to society and relationship with local communities

Relationship with customers and users

GOVERNANCE TOPICS (G)

Business ethics and governance

Corruption, bribery and money laundering

Digitalization and innovation

Cybersecurity and data processing

Business risk management

3. PRIORITIZATION OF IMPACTS

Impacts were assessed using a methodology that combined their scope, probability and remediability, as well as the internal and external relevance of each impact.

As an essential part of the process, the company's main stakeholders, both internal and external, have been involved through interviews and questionnaires.

Internal stakeholders

Directors

Prioritization of topics through interviews and questionnaires.

Business lines consulted

- Cleaning
- Maintenance
- Environment
- Security
- Facility Management
- Healthcare
- Temporary Work
- Auxiliary services

External stakeholders

Foundations

Prioritization of topics through interviews.

Customers

Prioritization of topics through interviews.

Suppliers

Prioritization of topics through interviews.

4. DATA PROCESSING AND RESULTS

Finally, the information obtained from stakeholder consultations has been compiled and processed, identifying the main topics related to each of the impacts identified.

The result of this final part of the process is a list of the most relevant ESG impacts and topics for the company, considering their scope, likelihood and remediability, as well as the scale of importance given to them by its stakeholders.

The results have been validated by Grupo EULEN's CSR department, which has acted as a fundamental part of the process.

The prioritization of the most relevant ESG topics is included below. The identification of these topics is based on the identification of impacts carried out as indicated above.

In the assessment, the scope, probability and remediability of the impacts have been considered, as well as the scale ratings assigned by the stakeholders participating in the consultation process.

The result has been the identification of **18 topics** for the company which, in turn, have been classified into a High, Medium and Low level of importance, as represented in the following matrix. The topics identified in the materiality assessment with Medium and High importance are those included in the Report.

HIGH IMPORTANCE	
1. Equality, diversity and inclusion	
2. Talent management and working conditions	
3. Business risk management	
4. Digitalization and innovation	
5. Relationship with customers and users	
MEDIUM IMPORTANCE	
6. Energy efficiency and reduction of emissions	
7. Contribution to society and relationship with local communities	
8. Occupational health and safety	
9. Corruption, bribery and money laundering	
10. Resource use and management	
11. Cybersecurity and data processing	
12. Business ethics and governance	
13. Labor conditions of workers in the value chain	
14. Water management	
15. Waste management and Circular Economy	
LOW IMPORTANCE	
16. Adaptation to climate change	
17. Environmental pollution	
18. Biodiversity and natural capital	

# Management of risks and opportunities

Risk management in the Group is a strategic priority, a process driven by Senior Management with the responsibility of each and every member of the Group, which aims to respond effectively to the possible eventualities that the company may face, determining the possible impacts and their recurrence, with the objective of implementing the necessary measures to provide reasonable security, minimizing the impact and providing all stakeholders with an adequate level of guarantees.

In this context, the Group's Risk Management system establishes the basic principles, key risk factors and the general framework for managing and controlling the risks affecting the Group. This management system has a company-wide scope of application.

The risk management system is developed and complemented through specific internal policies or regulations in relation to certain units or areas of the Group and present in each of the stages of this process.

## Risk management process

The company has a defined risk management process that allows it to identify, measure, evaluate, prioritize, control and manage the risks to which it is exposed, and thus decide how to assume, mitigate or avoid them.

The stages contemplated in the risk assessment process are:

In 2022, 98 risks have been identified, classified by type of risk:

- Compliance
- Strategic
- Financial
- Operational
- Other

(\*) Operating risks (51%) arise from the natural course of the company's economic activity.

# People: our main asset

## A model designed for people and the future

In 2022, the company celebrated its 60th anniversary and, from the outset, Grupo EULEN has always been clear that the driving force behind the company’s sustained growth is its people. With more than 74,000 employees, social responsibility has always been very present, guaranteeing essential issues such as human rights, labor standards, the environment and the fight against corruption.

Understanding human capital as the sum of diverse talents is fundamental to achieving the sustainable model that the Group is pursuing.

Four pillars underpin the Group’s people principles: our culture and values, which are reflected in our employment policies; team diversity and equal opportunities; a commitment to talent, particularly professional growth and internal promotion; and workplace health and safety.

With **97** different nationalities, women account for **54%** of the workforce, **52%** are people under **30** years or over **50** years and in **2022**, we had **2,385** people with some type of disability ( **7.58%** increase compared to **2021**).

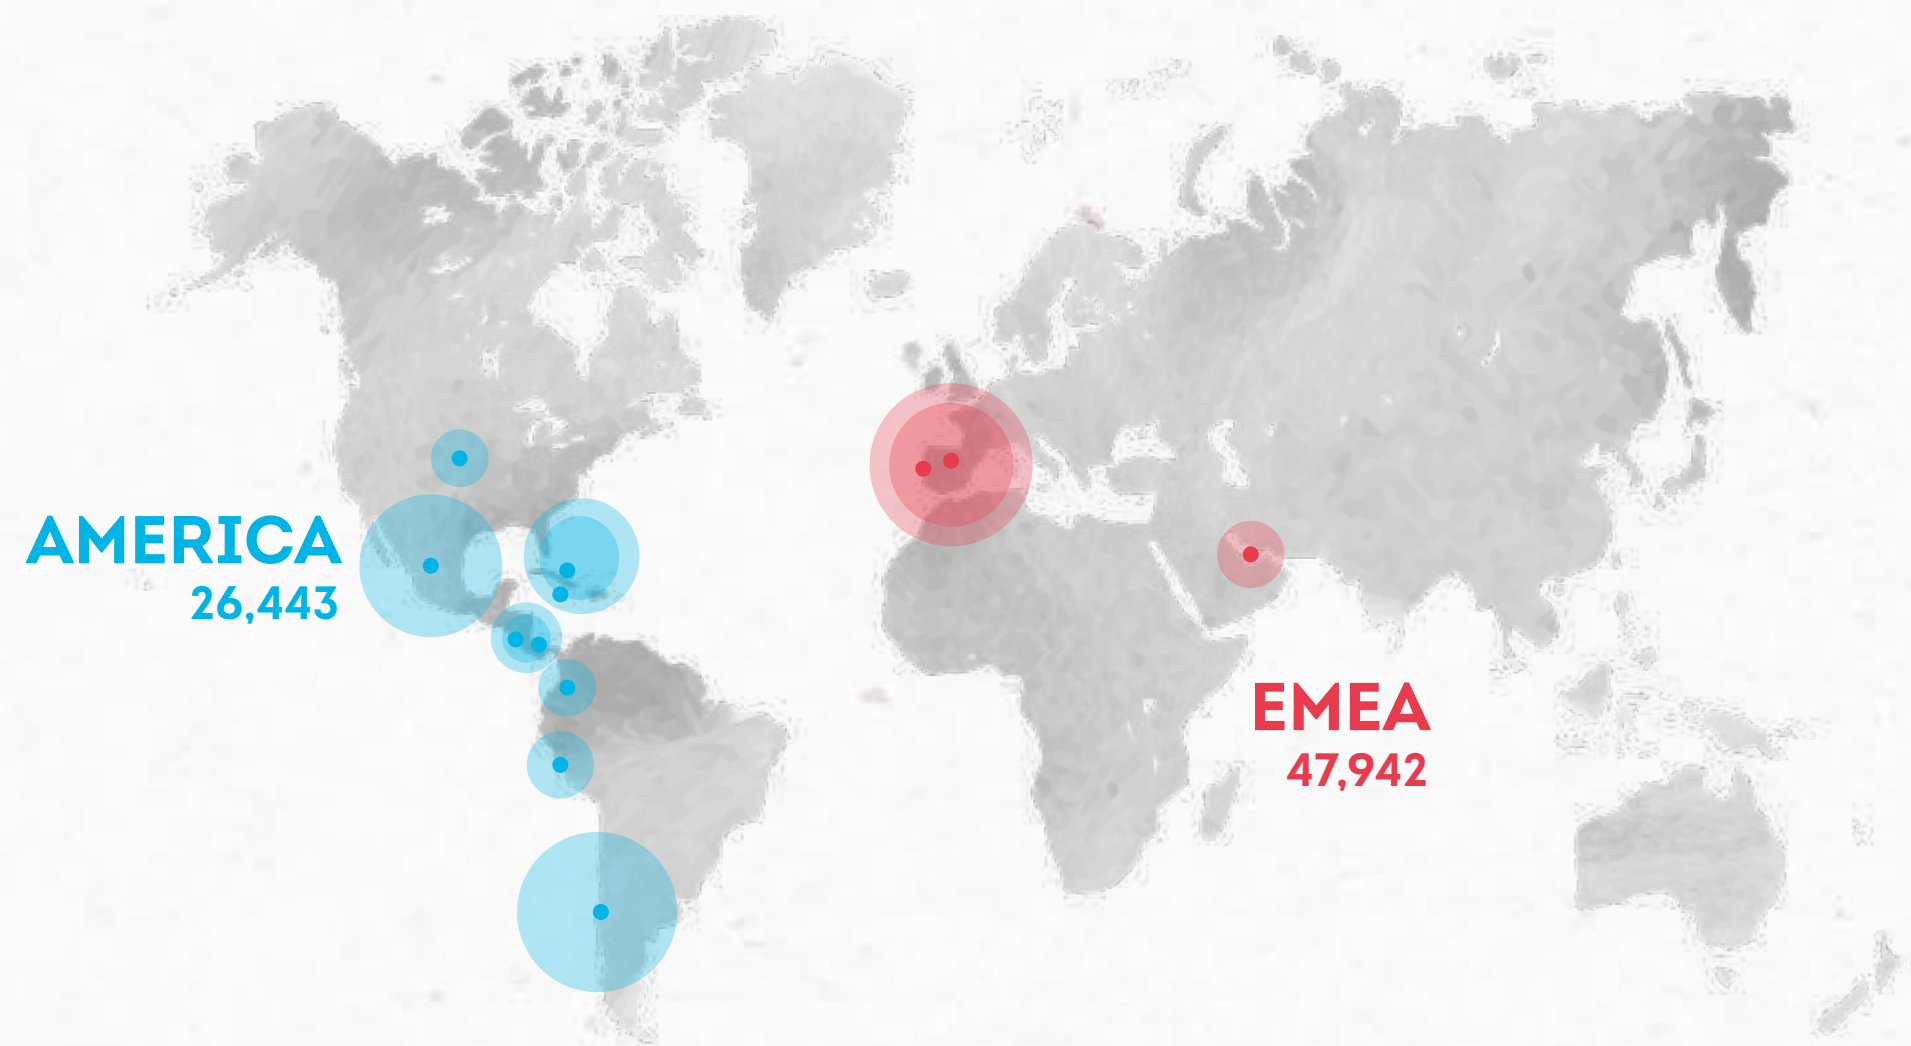

PILLARS	2021 MILESTONES	SDGS
Employment	<ul style="list-style-type: none"><li>- With 74,385 employees worldwide, we work to contribute to the improvement of our employees’ quality of life, working conditions and, ultimately, to meet their expectations. Our aim is to provide the most enriching and attractive working environment possible.</li></ul>

## Diversity and inclusion

Diversity and inclusion are some of our key principles. Our employees represent 97 different nationalities, women account for 54% of our workforce, 52% are people under 30 years or over 50 years and in 2021, we had 2,385 people with disabilities, an increase of 7.58% compared to 2021.

Having a diverse workforce, with different experiences, skills and perspectives is essential to us, as it ensures a work environment where all people are valued and respected equally, and where they are accepted as they are, regardless of

their race, ethnicity, gender or gender identity, sexual orientation, age, religion, nationality or any other characteristic.

These principles are put into practice through the company's HR policies and strategies, which foster an inclusive and diverse work environment and establish the framework that promotes the values of diversity, multiculturalism, acceptance and integration in all of our company's entities, and governs our actions in terms of people.

### GENDER

54% women

### GENERATIONAL

52% are people under 30 or over 50 years of age

### DISABILITY

2,385 people with disabilities.

### CULTURAL

97 different nationalities

## Diversity and inclusion

In terms of gender equality, the Group is committed to equality and diversity, and to this end promotes an inclusive work environment where people, regardless of their gender, can contribute to their own success and that of the company.

To this end, this commitment is implemented transversally through all HR management policies in the company: hiring, selection, training, performance measurement, promotion, remuneration, working conditions, work-life balance, communication and prevention of harassment.

With Equality Plans as a key tool for the fulfillment of the principles described above, the company also develops multiple awareness campaigns in this area that seek to raise awareness to ensure that equality is part of all areas of action of the company.

In 2022, women account for 54% of the workforce. To promote the role of women in the company, initiatives are developed to favor their access to Management positions. Grupo EULEN is chaired by a woman and promotes all kinds of measures to promote equality, incorporating them in its different HR policies.

In terms of generational diversity, people under 30 and over 50 years form a group that faces various problems when it comes to joining the labor market. In 2022, 52% of Grupo EULEN's workforce is between these ages.

The company's HR department implements different programs every year, with a clear commitment to generational

diversity. One of them is the Leadership School, whose main purpose is to contribute to the development of people. Based on self-knowledge, they identify the best they have

(their talents), seek a connection with their professional facet and, from there, they grow and develop in a practical environment, where they experience and apply everything they internalize.

Another notable program is our Mentoring Community. Its purpose is to contribute to the personal and professional development of the Company's employees, while at the same time acting as a transmitter of the Group's culture and values.

Since its foundation, Grupo EULEN has been characterized by innovation, as a model for the service sector and, above all, by its people, who from the beginning have contributed their talents to train other generations and

continue to leave their mark. It is this uniqueness that we contribute to perpetuate from the Mentoring Community. It is about preserving the best of the culture of the Organization and of the people, adapting it to each era and generation without losing its essence.

For us, this transmission can only be done by example, person to person, with a clear commitment to the development and transmission of knowledge between people of different generations, and this is where our Mentoring Community takes on its full meaning.

LEADERSHIP SCHOOL		
SELF-KNOWLEDGE:	RELATIONAL TOOLS (INTERPERSONAL MANAGEMENT)	CASE WORKSHOPS
Individual process, focused on a person's growth from the best they have, incorporating the necessary skills and management of emotions.	Techniques and resources that help the person to listen, empathize, give an opinion and, in short, to relate to other people in a productive way.	Practical exercises to simulate work situations, which are based on the individual's talents and in which the tools worked on in the previous stage are applied to the management of the cases presented.

MENTOR SCHOOL
<p>In 2022, we have carried out more than 40 mentoring processes, mainly aimed at:</p> <ul style="list-style-type: none"><li>• People who are participating in Development Programs.</li><li>• Employees who have recently been promoted or changed their position.</li><li>• New hires.</li></ul>

## Diversity and inclusion

Regarding the development of projects for the integration of people belonging to groups at risk of exclusion, our commitment is maximum, whether they are people with disabilities, immigrants, people at risk of social exclusion, young people or the elderly unemployed.

In this regard, the company has been working for 16 years on measures to ensure universal accessibility for these groups. It collaborates and has agreements with more than 396 organizations that work for the reintegration and comprehensive development of these groups at risk of exclusion.

One of the main insertion projects launched by the company in 2018 is 'La diferencia Suma'.

Thanks to this project, in 2022, we had 2,385 professionals with some type of disability, a 7.58% increase over 2021.

This is an initiative launched by Grupo EULEN in Spain. As part of the company's values, we aim to continue to strengthen and promote the social and occupational integration of people with disabilities and other groups at risk of exclusion.

backgrounds, in 2022, Grupo EULEN had a total of 97 different nationalities. To promote the cultural integration of all these people of different nationalities, the company offers all employees an online training course called "Diversity Management", which deals with the different nationalities that make up the Group.

Along the same lines, the EULEN Corporate University (UCE), created in 2017, includes a Culture and Values Classroom that promotes the maintenance of the values that the company has held throughout its long history. From this classroom, the following principles are included in all programs:

## Talent management

Talent management is another of Grupo EULEN's strategic pillars, as we firmly believe that our growth and evolution are closely linked to that of our employees. To this end, the company implements various specific talent development programs that promote professional growth.

Talent management has three main goals:

- To promote the attraction of the best talent to work with us.
- To identify the best that our employees have and promote their growth through skills development and training.
- To offer a safe and enriching work environment, with attractive conditions that help us retain talent.

## Total training hours in 2022

677,734

In order to have the best professionals in the sector, training is essential. At this time, the company has a clear training strategy defined for the coming years, and differentiated in the two organizations that will govern training in the future.

- **EULEN Training Institute:** Grupo EULEN employee training is managed through the EULEN Training Institute (IEF), through which annual training plans are implemented. These plans are organized into different blocks and their purpose is to develop the technical knowledge, skills and competencies of professionals in the different areas of activity.
- **EULEN Corporate University (UCE):** the UCE is Grupo EULEN's response to the continuous changes in the environment: digital transformation, innovation and above all, people. In this sense, the UCE was created with the objective of training and professionally developing the company's employees in order to respond to the needs of the business in line with the fulfillment of the corporate strategic plan and at the same time maintain and transmit the values and culture of Grupo EULEN.

It is a living University, in continuous adaptation to the evolution of the business, which has gone from 7 areas of knowledge to a total of 9 that cover different training and development programs.

During the last year, the focus has been on digital transformation and research, developing from our classrooms numerous academic projects that have been put into practice.

We have an on-site campus of more than 1,000 m2 and also a virtual campus for students.

The corporate training center has specialized spaces for various lines of training:

- A classroom specialized in cleaning with different types of floors and materials.
- A classroom specialized in social and healthcare matters, residential center simulator.
- A classroom specialized in hotels, hotel room simulator.
- A classroom called 'Ideas Lab', a space for innovation and research.
- Specialized LEAN methodology classroom.
- Digital Transformation Room, a space in which some of the enabling technologies integrated into our Grupo EULEN services are presented.

# EULEN Corporate University

Born in 2017 with the objective of training and professionally developing the company's employees.

In recent years, we have focused on digital transformation and research, developing numerous academic projects from our training classrooms.

06 Strategy for sustainable development

**Digital training strategy:** The digital transformation in which the company is immersed also affects training channels. At Grupo EULEN, we promote online learning through three proprietary platforms:

- @prende.
- UCE virtual campus (uce.eulen.com).
- Open learning that allows us to develop our own resources,
- a collaborative space that allows us to share knowledge through our knowledge drivers.

With these platforms, employees are offered more than 400 training resources of various kinds, from training pills to long-term programs in collaboration with Universities and Business Schools.

One of our main challenges is to be able to bring training activities to the entire Grupo EULEN at a corporate level, and thanks to the technology and new training methodologies we use, we are able to achieve this.

We use advanced training tools such as: e-learning, gamification, virtual training, hybrid training, etc. In our facilities we have fully equipped hybrid classrooms that allow the virtual environment to be an active extension of the classroom, we also have a recording center for the production of our own materials.

During 2022 we have continued working on online, virtual and hybrid training activities. We have created a user manual to help organizers, trainers and students to improve the usability of hybrid training courses. In addition, effective training in digital communication has been provided for teachers.

In 2022, we created the physical Digital Transformation Room with the aim of promoting and building the company's digital culture through proven technological projects that serve as inspiration for others.

**Leadership School:** in 2022 we launched two programs, for a total of 22 people that will end in the first quarter of 2023.

**Mentoring Community:** We currently have 30 active mentors and throughout 2022 we have carried out more than 40 mentoring processes. The main achievements of these processes are the following:

- People who feel motivated, recognized and focused on their objectives from the start of their mentoring;
- To increase the professionalism and responsibility in the performance of their duties;
- To ensure that the activities inherent to the position are carried out in accordance with a common culture and philosophy;
- To generate a planned and rigorous learning culture, which allows for efficient behaviors and longer-term results.

**'Transform' program for high-performance teams:** Two 'Transform' programs were launched in 2022.

**Competency-based performance evaluations:** Every year, 180<sup>9</sup> competency-based performance evaluations are carried out on all employees who are part of Grupo EULEN's structure in the 14 countries where it is present. The process is carried out through a web-based management tool, accessible from any device with an Internet connection. Using this tool, the employee must carry out their self-assessment, the evaluation of a colleague and that of their own collaborators. In the same way, the tool collects the feedback interviews conducted after the evaluation and the growth commitments acquired.

**Talent Program:** In 2022, we implemented the 3rd edition of the Talent Program in its entirety for 20 people.

PEOPLE DEVELOPMENT PROGRAMS

DEVELOPMENT PROGRAM LEADERSHIP SCHOOL	This program is committed to experiential learning, in a collaborative environment of maximum trust, in which colleagues share their own point of view on the cases worked on, always in a confidential manner.
DEVELOPMENT PROGRAM MENTORING COMMUNITY	For Grupo EULEN, the best way to convey knowledge, motivate the employee and help them become more productive, is through the example of people who have stimulated learning in their teams.
'TRANSFORM' PROGRAM FOR HIGH- PERFORMANCE TEAMS	Focused on developing cohesive, efficient teams. It seeks to unleash the potential of teams, maximize their performance and generate better results in terms of efficiency and performance.
COMPETENCY PERFORMANCE ASSESSMENT	The performance assessment process is a fundamental lever in the Group's people management. It is the system used to determine the level of compliance with the competencies required by the position held by each of the Group's structural employees.
TALENT PROGRAM	This is a talent identification and development program for middle management and operating staff. It is a strategic people development program, in which participants rediscover their talents and how to apply them by creating new personal development initiatives and business ideas (Big Idea).

(2-30)

Health, security and well-being

Employee health and safety is a priority for Grupo EULEN. Our determination to eliminate hazards and reduce risks that may compromise health in the different workplaces is clearly reflected in our Corporate Occupational Risk Prevention Policy.

To this end, prevention management is integrated and present in all processes and hierarchical lines of the company, with a continuous improvement management system based on international standards, to ensure optimal health and safety conditions (ISO 45001:2018).

Health and Safety Committees: in Spain they meet at least on a quarterly basis and are made up of company representatives and prevention delegates, with the advice of SPM prevention technicians. Actions being carried out by the company in terms of risk prevention are presented and consulted in these meetings, as are the Prevention

Plans, the Annual Report, the Annual Planning of prevention services, etc. Outside Spain, the aspects related to occupational health and safety are included in the collective agreements of each country.

In 2022, Grupo EULEN's Prevention Services have managed the pandemic in accordance with the health guidelines of each country, applying the current regulations and preventive measures in the workplace, adapting offices and/or workplaces, informing and training on the new risks, prevention and protection measures against the virus for all workers, etc.

Accident rates

Absenteeism OA	2022	
No. of hours of absenteeism due to occupational accident	539,244	
% of absenteeism due to occupational accident (No. hours of absenteeism due to occupational accidents/No. hours worked)*100	0.39%

Annual incidence rate (No. occupational accidents with sick leave *1,000 workers)	55.68	44.37
In the year 2022: - 13% decrease in the Severity Rate compared to 2021.		

## Social Relations

(102-41)

Grupo EULEN bases its employment and social relations with employees on the universal principle of protecting human rights. This commitment is set out in the Code of Ethics, which includes the principles and general rules of conduct that govern Grupo EULEN's stakeholder relations, as well as the commitment to act in accordance with values that guarantee ethical and responsible behavior that respects current legislation.

The company is present in the main business associations and has close ties with trade union organizations. Through its HR department, the company participates in collective bargaining, looking after the interests of the company and the entire workforce. The Group also participates in sectoral observatories in collaboration with business associations and the most representative trade union organizations in the defense of people's rights and respect for collective bargaining agreements.

Collective Bargaining Agreements Spain	2022
Number of employees within the collective bargaining agreement	46,745
% Employees within the agreement	99%

06 Strategy for sustainable development

The Group works continuously to contribute to the improvement of our employees' quality of life, working conditions and, ultimately, to meet their expectations. Our aim is to provide the most enriching and attractive working environment possible, and to this end we have a series of policies and measures that have been implemented over the years and that will continue to be implemented and continuously improved in response to our goal of sustainable socio-economic growth.

PRINCIPLES THAT GOVERN OUR HIRING POLICY

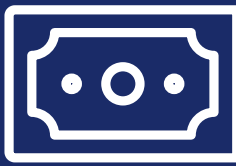

- To promote the mission, vision and values of Grupo EULEN,
- To select the most suitable candidate,
- To promote effective equality between men and women,
- To promote the hiring of workers from social groups that are underrepresented,
- To prohibit the hiring of minors,
- To review the hiring of family members, relatives and/or referrals of Group employees,
- To optimize human resources to improve the company's competitiveness,
- To consolidate quality employment and facilitate labor flexibility,
- To prioritize internal promotion.

The aforementioned principles are fully aligned with the general rules of conduct and principles of action of the code of ethics. In accordance with these principles and values, we make special mention of the rejection of forced labor and/or child labor.

HIRING POLICY	<p>Published at the end of 2016, the policy contains the general principles and criteria that govern Grupo EULEN's hiring policy in the different countries in which it operates, from the existence of a vacancy until the employee joins the company.</p> <p>The policy aims to ensure non-discrimination in access to employment, guaranteeing the use of professional criteria regarding the suitability of the candidate for each job, in accordance with the requirements of the commitment to corporate responsibility in the provision of services to its customers.</p>
EQUALITY AND WORK-LIFE BALANCE POLICY	<p>It reflects the company's commitment to the development of labor relations based on equal opportunities, non-discrimination, work-life balance and respect for diversity. This is part of the organization's core values and its corporate mission.</p>
EQUALITY PLANS	<p>In Spain, equality plans have been negotiated and implemented for more than 12 years, with the aim of promoting equality across all levels of the organization. These plans are continuously monitored and renewed to adapt their objectives and measures to changing needs and to the Group's own evolution and maturity, paying special attention to its commitment to preserving the rights of women victims of gender-based violence. In the other countries in which Grupo EULEN operates, the Group's codes of good conduct, its code of ethics and all policies relating to the equality of the people who form part of the company are in force.</p>
POLICY AGAINST ALL FORMS OF HARASSMENT	<p>This reflects the company's commitment to the prevention and suppression of all forms of harassment within its organization. In this regard, in order to ensure that people do not become victims of harassment, the Group has implemented a procedure "against all forms of harassment" which aims to establish an action protocol for the prevention and solution of possible cases of harassment (of any kind), which may arise in accordance with the "policy", which have been incorporated into the Group's regulatory system.</p> <p>Any possible harassment situation will be dealt with promptly, confidentially and impartially. Grupo EULEN's regulatory system empowers everyone, regardless of the country in which they work, to report any act of harassment in the workplace to the competent internal bodies.</p>
PEOPLE COMMITTEE	<p>Its purpose is to make decisions about the employees who are part of Grupo EULEN's structure. The committees deal with issues related to promotions, succession plans, development plans, training, remuneration, incentives, bonuses, terminations and other issues related to people management.</p>
DIGITAL DISCONNECTION POLICY	<p>Published in 2020, its purpose is to guarantee, outside the legally or conventionally established working hours, respect for rest, leave and vacation time, as well as personal and family privacy.</p>
PROCEDURE FOR RESOLVING CONFLICTS IN INTERPERSONAL RELATIONS	<p>Published in 2021, its purpose is to establish a protocol to favor the resolution of labor incidents that may arise in interpersonal relationships in the workplace, guaranteeing an objective, effective and confidential process for the affected parties. The procedure will be processed through mediation between the parties involved. The mediator will be selected from the existing group of workers in the company who have the necessary skills to carry out these functions. The procedure will comply in all cases with the due confidentiality and duty of secrecy, always bearing in mind the prerogatives in these matters that must be followed in this type of matters.</p>

BALANCING WORK, PERSONAL AND FAMILY LIFE

Measures aimed at promoting the balancing of work, personal and family responsibilities, thus contributing to the development of a company with higher levels of well-being and quality of work; these are objectives and/or values that Grupo EULEN has included in its regulations and code of ethics.

				
Flexible schedule	Compressed work week	Intensive workday during the summer season	Flexible vacations	Sabbatical period
				
Life insurance	Loans and advances policy	Accumulation of breastfeeding hours	Medical-Social Counseling Hotline	Healthy lifestyle campaigns
				
Temporary reduction of working hours	Acquisition (purchase) of additional vacation days:	Cardiovascular and cerebrovascular disease prevention campaigns focused on healthy habits	EULEN Club	University for the elderly

Since 2018, at Grupo EULEN in Spain, we have been certified as a family-responsible company (efr®) for structural staff, granted by the MásFamilia Foundation, which is endorsed by the Ministry of Labor, Migration and Social Security. This certificate is renewed annually.

# Our supply chain

Sustainability in the supply chain is always present in our processes and in our business model. We are committed to extending our responsible and sustainable practices to our suppliers and subcontractors and this is reflected in each of our products and services.

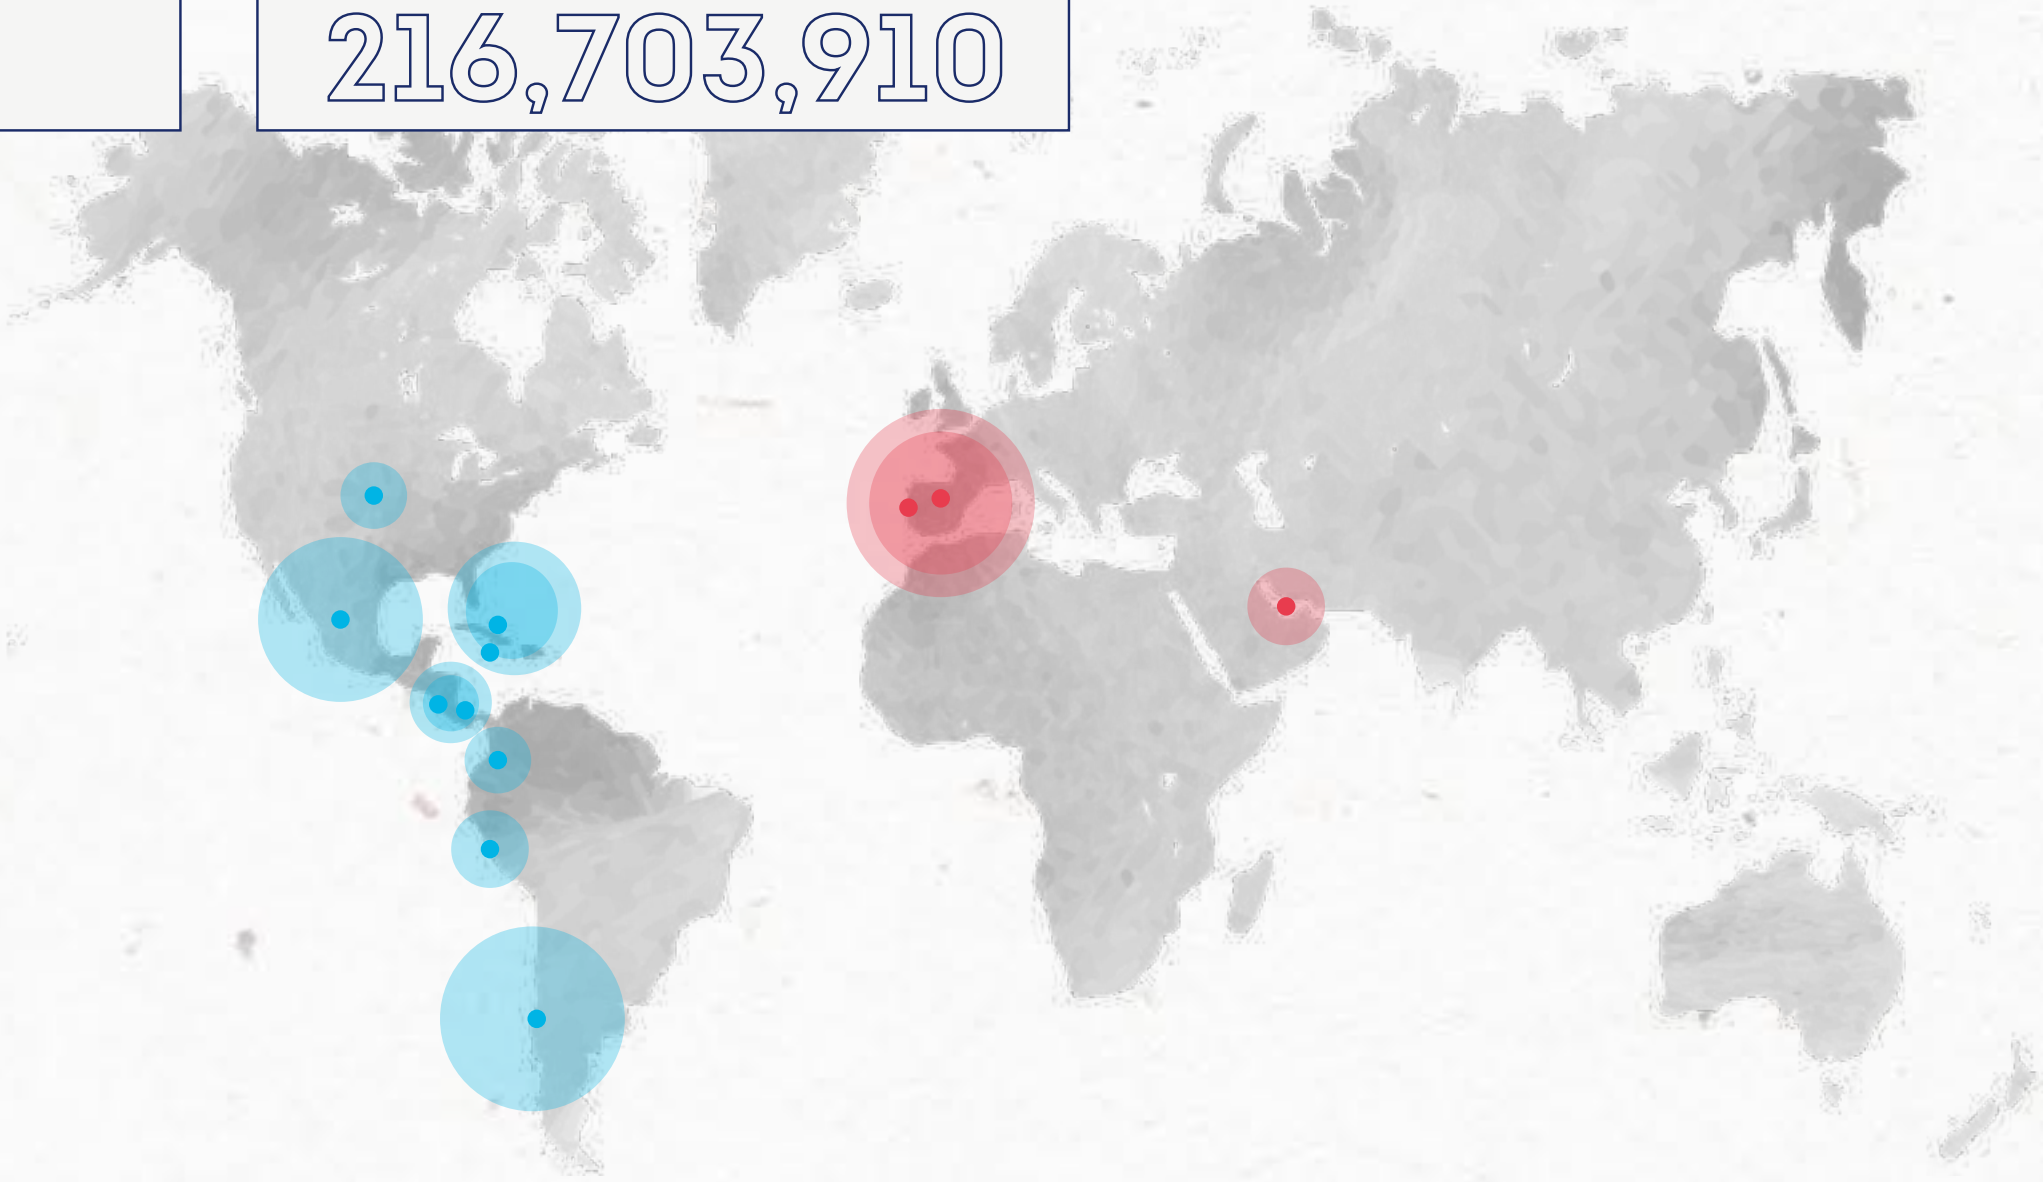

To achieve this, we maintain a continuous process of improvement and review in the application of responsible purchasing practices. In this way, we can ensure that our sustainability principles are applied throughout the supply chain, promoting a responsible production and consumption model that reduces our environmental and social impact.

We work to promote sustainability among our suppliers and partners, ensuring that they share our values and principles and that they apply sustainable practices in their own operations.

In 2022, a network of 8,577 suppliers are part of our supply chain. Every year we reaffirm our commitment to local commerce. In 2022, 99.80% of our suppliers are local. A total of 1,518 new suppliers have been approved and we have incorporated new requirements, including human rights, ethics, anti-corruption and LOPD (Data Protection Act) aspects.

PILLARS	2022 MILESTONES	SDGS
RESPONSIBLE MANAGEMENT OF THE SUPPLY CHAIN	<ul style="list-style-type: none"><li>• Our commitment to responsible supply chain management is key to ensuring the sustainable model to which Grupo EULEN is firmly committed.</li><li>• 8,577 suppliers in 2022.</li><li>• 1,518 new suppliers approved.</li><li>• Commitment to local commerce: 99.80% local suppliers.</li></ul>	

(\*) The data and indicators included in this section correspond to 92% (\*) of Grupo EULEN's activity, with the following geographical scope: Spain, Portugal, Chile, Colombia, Peru, Mexico and the Dominican Republic.

Supply chain management	2022
Commitment to local commerce Percentage of local purchases with respect to total purchases from suppliers (€)	99.80%
No. of new suppliers approved	1,518
Percentage of new suppliers approved based on environmental criteria	85%
Percentage of new suppliers approved based on human rights criteria	75%
Percentage of new suppliers approved based on social criteria	75%
Supplier evaluations	716

# Commitment to local commerce

Grupo EULEN is committed to local commerce as a way of promoting the economic and social development of its community. In this regard, the company is committed to promoting local trade and actively works to purchase from suppliers close to its location.

The Group also ensures that the local suppliers it works with meet the quality, sustainability and social responsibility requirements established in its supplier approval process. In this way, the company not only supports local suppliers, but also ensures the quality and sustainability of the products it purchases.

By working with local suppliers, the company not only supports its environment, but can also benefit from greater flexibility and adaptability in its supply chain, reduced transportation costs and lower associated emissions.

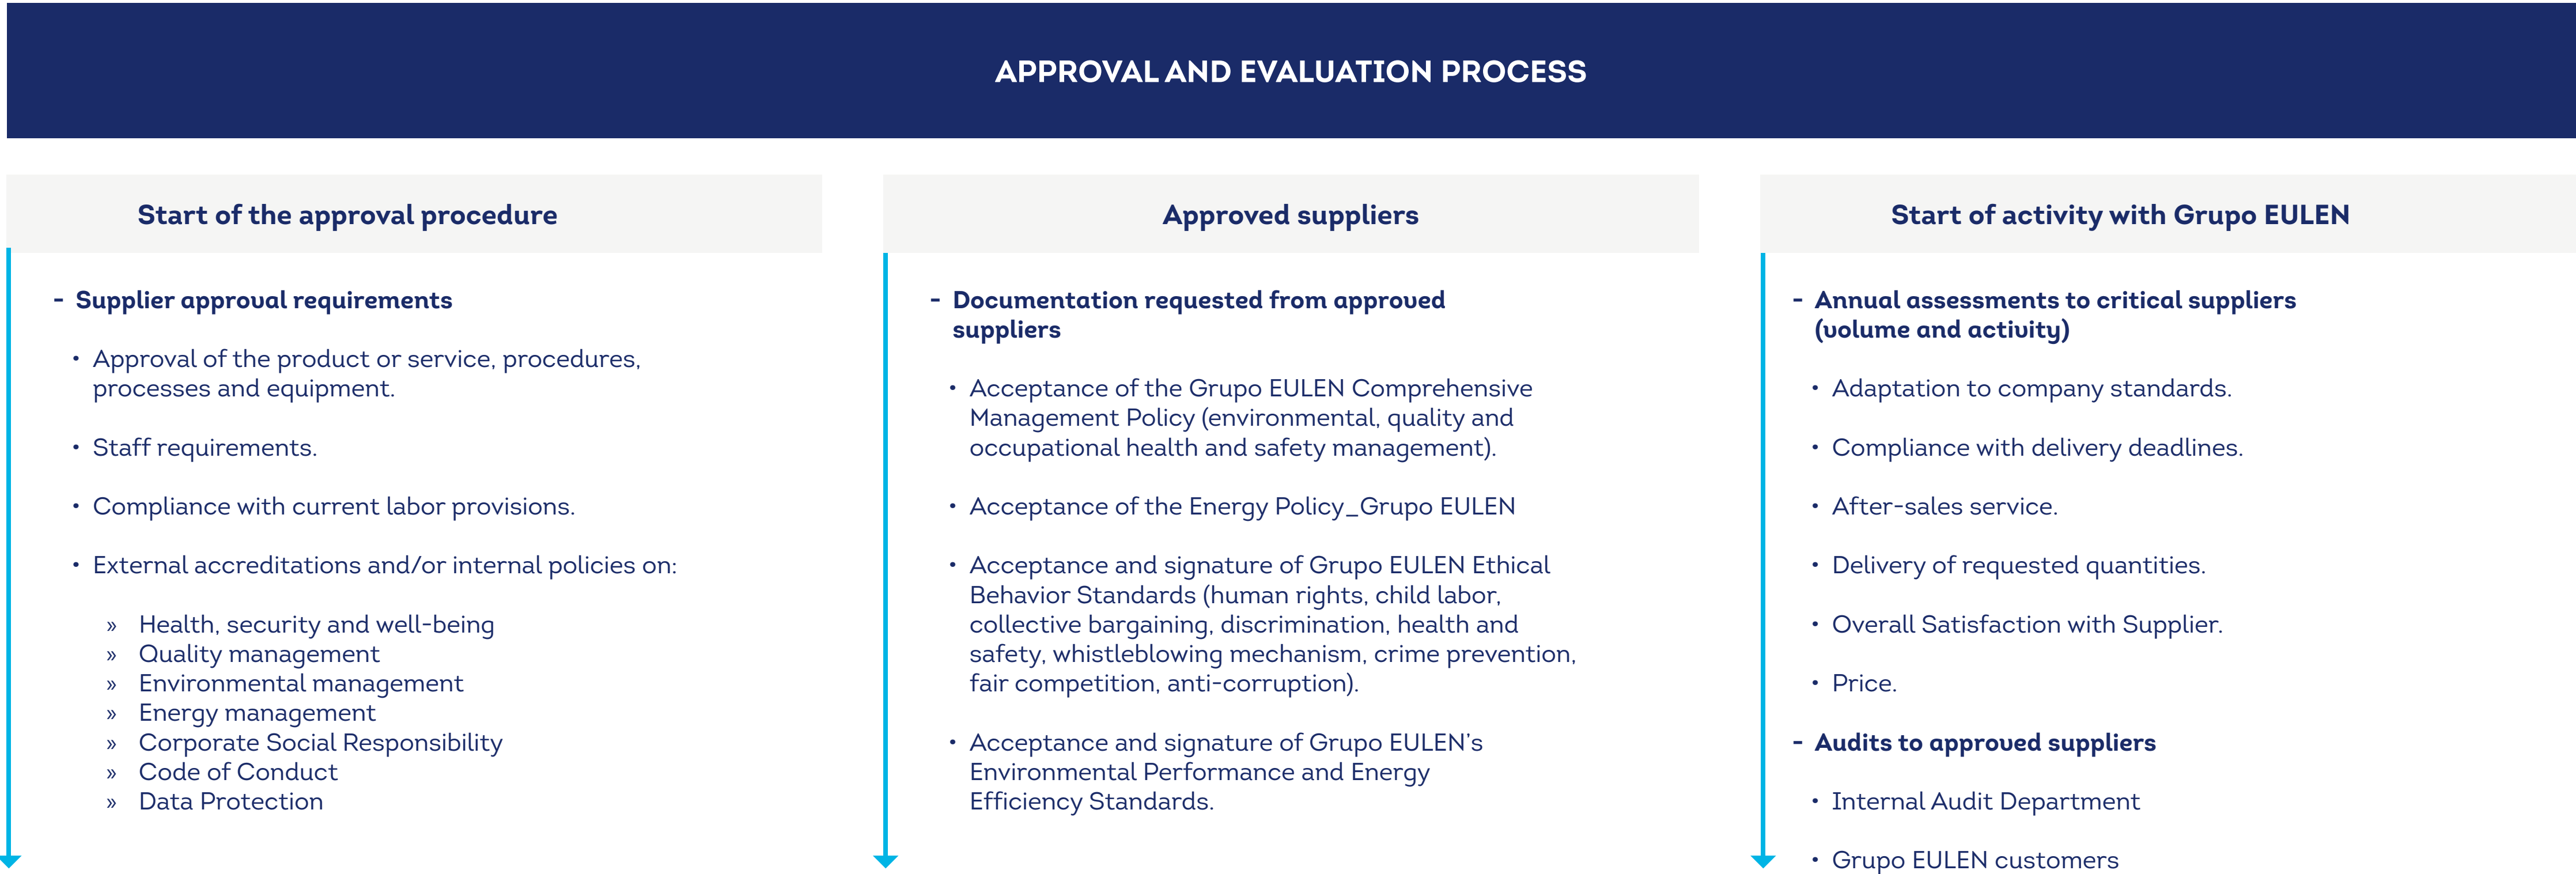

Practically all purchases from suppliers (99.80%) are made from companies physically located in each country. In this way, we benefit from greater contact with the environment and the possibility of creating an extensive network of reliable suppliers.

## Approval and evaluation: stages in supply chain management

For Grupo EULEN, the approval of its suppliers is a key aspect to guarantee the quality of the products and services acquired, as well as to ensure compliance with the sustainability and social responsibility standards that the company has established. For this reason, the company has a system of approval and subsequent evaluation, in which a series of purchasing criteria are established to ascertain, verify and monitor the responsible performance of the companies that form part of the supply chain. In order to approve its suppliers, Grupo EULEN has a well-defined procedure that includes a series of criteria

and requirements that suppliers must meet in order to work with the company. These criteria are established based on the needs of the company and the standards and regulations in force regarding quality, environment, safety and health, etc.

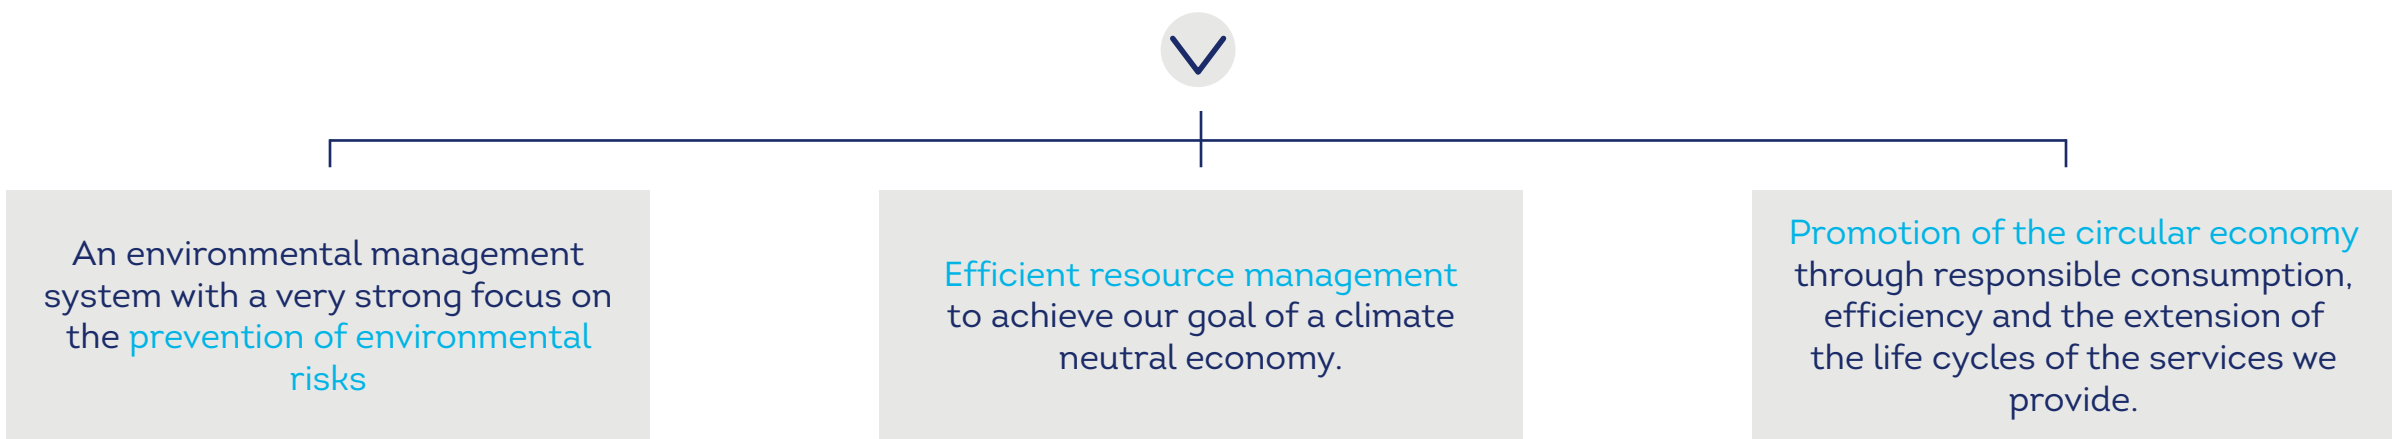

# Commitment to environmental protection

## Decarbonization and circular economy (\*)

Grupo EULEN is firmly committed to respecting the environment. In the coming years, specifically for the 2022-2025 period, the Group will focus its environmental protection actions on two main lines of action:

- the implementation of decarbonization actions that will allow us, firstly, to progressively reduce our CO<sub>2</sub> emissions into the atmosphere and secondly, to offset the CO<sub>2</sub> emissions resulting after the reduction actions. All of this, as part of our ultimate goal of achieving climate neutrality by 2050 and
- the development of circular economy solutions, with the aim of achieving a business model based on zero waste.

### THREE LINES OF ACTION ARE THE BASIS FOR ACHIEVING OUR ENVIRONMENTAL GOALS

LINES OF ACTION	2022 MILESTONES	SDGS
Environmental risk prevention approach	<ul style="list-style-type: none"><li>• Environmental expenditure and investments: environmental expenditure and investment in 2022, amounted to €3,093,497 Euros (€13 million since 2015).</li><li>• Creation of a new Asset Manager profile whose main function will be to administer and manage all company vehicles and machinery.</li><li>• Expenditure on environmental training in the Group has increased by 33% compared to 2021: Training in sustainable development: in 2022, 1,197 structural employees received this type of training. Training in environmental awareness and sensitization of the Group: in 2022, 84 structural employees received this type of training. This year we have ensured that practically all of the Group's 2,300 structural staff are trained in this area, since its implementation in 2010.</li></ul>	
Efficient resource management: energy, water and paper	<ul style="list-style-type: none"><li>• Renewable energy in our offices: Since 2018, 100% of the electricity consumed in Grupo EULEN offices in Spain has come from renewable energy sources accredited by the Guarantee of Origin (GoO) document. Globally, this means that 84% of the total electrical power consumed by Grupo EULEN comes from renewable sources, which has a very positive impact on the Group's CO<sub>2</sub> emissions.</li><li>• Solar energy: in 2022, a photovoltaic solar energy system was installed at Grupo EULEN's headquarters in Madrid. This is intended to supply part of the facilities' electricity requirements, thus reducing power consumption from the grid.</li><li>• Decarbonization- GHG emissions: 5.42% reduction in the total tons of CO<sub>2</sub> emitted by Grupo EULEN, compared to 2021</li><li>• In our offices: electric power, 2% decrease compared to 2021. Fuels: significant 63% decrease in diesel consumption compared to 2021. 9% decrease in natural gas consumption.</li><li>• In vehicles and machinery: Decrease in diesel consumption in vehicles of 0.39% compared to 2021. In LPG, decrease in both vehicles and machinery of 20% and 75%, respectively.</li><li>• Energy-efficient vehicles: considerable increase in this investment. In 2022, the Group has 400 vehicles that use this type of energy: electric, hybrid, autogas or LPG, compared to 198 in 2021.</li><li>• Paper: In 2022, following the same trend as in previous years, the decrease in this indicator compared to 2021 (3%) is noteworthy.</li></ul>	<div><div>6 AGUA LIMPA Y SANEAMENTO</div><div>7 ENERGIA LIMPA E ACCESÍVEL</div><div>11 INDÚSTRIA E INOVAÇÃO SUSTENTÁVEL</div><div>12 PRODUÇÃO E CONSUMO CONSUMO RESPONSÁVEL</div><div>13 AÇÃO PARA O CLIMA</div><div>14 VIDA SUBMARIÑA</div><div>15 VIDA DE ECOSISTEMAS TERRESTRES</div></div>
Circular Economy	<ul style="list-style-type: none"><li>• The company's main strategy, in line with its commitment to the circular economy and sustainability, is to achieve zero waste through waste prevention and recovery (reuse, recycling or energy recovery).</li><li>• 99% of our waste is sent for recycling.</li><li>• First major Spanish company to obtain the EU ECOLABEL certificate.</li></ul>	

(\*) The data and indicators included in this section correspond to 92% (\*) of Grupo EULEN's activity, with the following geographical scope: Spain, Portugal, Chile, Colombia, Peru, Mexico and the Dominican Republic.

## Environmental risk prevention approach

Grupo EULEN's environmental management system bases its policies on an environmental risk prevention approach, the pillars of which are based on the Integrated Management Policy (Environmental, Quality and Occupational Health and Safety Management) and ISO 14001:2015 certification.

In recent years, Grupo EULEN has made an important effort in environmental management, through environmental expenditure/investment of approximately 13,000,000 Euros since 2015.

In 2022, the Group has continued with this trend, and the environmental expenditure and investment dedicated to this section amounted to 3,093,497 Euros.

Environmental expenditure and investments (€)	2020	2021	2022
Environmental expenditure	2,898,499	1,873,110	2,188,234
Environmental investments	961,645	886,174	905,497
TOTAL	3,860,145	2,759,283	3,093,497

This year, this environmental investment has enabled us to launch or continue initiatives and projects that have helped us to advance our environmental protection and climate action strategy.

The main ones are:

- **Resources dedicated to the prevention of environmental risks:**
  - Expenditure on environmental training in the Group has increased by 33% compared to 2021:
  - Training in sustainable development: in 2022, 1,197 structural employees received this type of training.

- Training in environmental awareness and sensitization of the Group: in 2022, 84 structural employees received this type of training. This year we have ensured that practically all of the Group's 2,300 structural staff are trained in this area, since its implementation in 2010.
- Technical staff specializing in environmental management. The Group has a quality and CSR department in Spain and quality and environmental management departments in each of the countries covered by this report.
- Environmental risk prevention: 12% increase, compared to 2021, in expenditure on environmental audits and certifications. As has been the case since 2018, the increase in expenditure allocated to this type of internal and external controls continues.
- Grupo EULEN in Spain has a provision for environmental risks through an environmental liability insurance policy.
- There has been continuing growth (66% compared to 2021) in expenditure on participation in international environmental associations and organizations, including the United Nations Global Compact and Forética.
- **Chemical products:** in 2022 the company spends €500,000 on environmentally friendly and concentrated chemicals, accounting for 42% of total environmental expenditure.
- **Sustainable vehicles and machinery:** this investment, as has been the case since 2018, continues to be the Group's main environmental investment, accounting for 56% of total investments in 2022.
- **Less polluting vehicles:** by 2022, considerable increase in this investment. In 2022, the Group has 400 vehicles that use this type of energy: electric, hybrid, autogas or LPG, compared to 198 in 2021.
- **Circular Economy:**
  - Incorporation of new technologies such as LPG-fueled bio-chipper machinery for minimizing plant debris and reincorporating it into the soil.
  - New hires of specialized mechanical technicians to obtain greater efficiency and performance of used machinery in order to extend the useful life cycle of the company's assets.
  - Creation of a new Asset Manager profile whose main function will be to administer and manage all the company's vehicles and machinery, obtaining a better performance of the assets through circularity measures such as reuse, as well as a correct management and use of the company's resources.

## More sustainable offices

Each year, Grupo EULEN works to reduce environmental impacts by converting its offices into sustainable spaces while creating a positive experience for the workers who occupy them. These are some of the measures carried out:

- Sustainable mobility: installation of recharging points for electric vehicles at the company's headquarters in Madrid.
- Air conditioning measures: installation of efficient and sectorized air conditioning systems.
- Lighting efficiency: installation of energy-efficient lights and motion detectors.
- Incorporation of motion detection sensors (outside working hours) to improve the energy efficiency of buildings.
- Waste has been removed from all individual waste garbage cans and clean points have been installed with selective waste separation garbage cans (paper, organic and inorganic waste, packaging, batteries...), which favor the circularity of all these materials, as they improve separation and reduce waste.
- Control of domestic water consumption through the installation of timers.
- Replacement of plastic cups for paper cups in drinking water dispensers to avoid plastic, which implies the disappearance of these plastic materials.
- Canteen in our main offices with selective waste separation containers (paper, organic and inorganic waste, packaging, batteries...).
- In vending we are committed to healthy and environmentally responsible food.
- In our warehouses annexed to our offices, we have established circuits of selective waste collection containers, which facilitate separation and collection and thus improve the circularity of these products.

### USE OF SOLAR ENERGY

At the end of 2022, a photovoltaic solar energy system was installed on the roof of Grupo EULEN's headquarters building in Madrid. This is intended to supply part of the facilities' electricity requirements, thus reducing power consumption from the grid.

By 2023, the company will expand this investment to other Grupo EULEN offices in Spain.

## Decarbonization

### GHG EMISSIONS

In 2022, thanks to the set of actions implemented to promote energy efficiency, both in our offices and in our vehicles, combined with the materialization of our commitment to renewable energy in our facilities, we have achieved a 5.45% reduction in total emissions (t CO<sub>2</sub>eq) of Grupo EULEN, compared to 2021.

During 2022, we have continued to improve the system for capturing and calculating indicators. The graph shows the breakdown of our GHG emissions based on the categories established by GHG Protocol and ISO 14064.

- Scope 1: Direct emissions. These are the emissions associated with Grupo EULEN's direct control sources:
  - Emissions from fuel consumption at our facilities;
  - Emissions from the use of owned vehicles and machinery;
  - Fluorinated gas emissions from refrigeration equipment.
- Scope 2: Indirect GHG emissions from imported energy:
  - Emissions from electricity consumption at our facilities;
- Scope 3: Indirect GHG emissions from:
  - Emissions from the use of rented assets: emissions from the use of rented vehicles and machinery.
  - Emissions from the use of the organization's products: paper consumption.
  - Emissions from business travel.

### DECARBONIZATION PLAN

- During 2022, Grupo EULEN's Decarbonization Plan has been implemented with the following objectives:
- Calculate Grupo EULEN's GHG emissions.
  - Progressively reduce emissions.
  - Offset the company's Scope 1 and 2 emissions.

This decarbonization plan is another step forward for Grupo EULEN on our path towards climate neutrality.

EVOLUTION EMISSIONS (t CO<sub>2</sub> EQ/million sales)

EVOLUTION TOTAL EMISSIONS (Tm CO<sub>2</sub> EQ)

(\*) From 2021 onwards, emissions from the use of vehicles and machinery are classified as Scope 1 emissions: those derived from owned vehicles and machinery; and Scope 3 emissions: those derived from rented vehicles and machinery.

## Decarbonization

### WE ARE CARBON NEUTRAL IN SCOPE 1 AND 2

For the first time in the history of Grupo EULEN, all Scope 1 and 2 CO<sub>2</sub> emissions have been offset at the corporate level. This achievement has been possible thanks to the company's commitment to sustainability and environmental protection on its path towards climate neutrality.

Grupo EULEN is aware of its responsibility in the fight against climate change and has taken steps to minimize its impact on the environment. These include developing a decarbonization plan prioritizing the reduction of its carbon footprint through the implementation of sustainable practices in its daily operations.

As a first step in this decarbonization plan, Grupo EULEN has decided to offset all Scope 1 and 2 emissions through the acquisition of certified carbon credits in the 'Bosque EULEN' project, located in Spain, and in the 'Atacama Hydro 2' project located in Chile, which is the country on the American continent where Grupo EULEN has the largest presence.

The main purpose of the 'Atacama Hydro 2' project is to generate renewable electricity in a sustainable way through a flowing water hydroelectric power plant producing 57,396 MWh/year and supply it to the national electricity grid while avoiding the production of electricity from fossil fuels. This project has been certified through the international CDM (Clean Development Mechanism) standard included in the Kyoto Protocol.

Furthermore, this project will not only offset Grupo EULEN's Scope 1 and 2 emissions, but will also contribute to achieving five of the Sustainable Development Goals (SDGs) established by the United Nations: SDG3 Health and Well-being, SDG7 Affordable and Clean Energy, SDG8 Decent Work and Economic Growth, SDG9 Industry, Innovation and Infrastructure, and SDG13 Climate Action.

### GHG emissions by country

### Distribution of GHG emissions by source

# Efficient resource management: energy, water and paper

## Energy

In 2022, Grupo EULEN, in response to one of the main axes of our Sustainability Master Plan, Decarbonization, carried out various actions and projects for efficiency in energy consumption both in the company and in its customers.

The decarbonization of the entire value chain is closely related to the actions we are undertaking to reduce energy consumption, reuse water and recycle materials generated in operations.

Reducing our energy consumption and carbon emissions helps to reduce global warming and its effects on biodiversity, and circularity is an important tool for moving towards decarbonization.

Analysis of trends in energy consumption in our offices:

In 2022, compared to 2021, the trend is very positive, there has been a reduction in both electricity and fuel consumption, as shown in the graph:

- Electricity consumption in our facilities: 2% decrease compared to 2021.
- Significant 63% decrease in diesel consumption compared to 2021. Likewise, a 9% decrease in natural gas consumption.

OVERALL ENERGY CONSUMPTION IN FACILITIES (IN MWh)

The trend analysis in indicators of this section has been carried out for the years 2019 and 2020, due to the impact that the Covid19 health situation had on the indicators associated with the consumption of resources in the Group's facilities, as the presence of employees in the Group's offices was considerably reduced.

## RENEWABLE ENERGIES IN GRUPO EULEN'S OFFICES IN SPAIN

Since 2018, 100% of the electricity consumed in Grupo EULEN offices in Spain has come from renewable energy sources accredited by the Guarantee of Origin (GoO) document. Globally, this means that 84% of the total electrical power consumed by Grupo EULEN comes from renewable sources, which has a very positive impact on the Group's CO<sub>2</sub> emissions.

PERCENTAGE OF ELECTRICITY FROM RENEWABLE ENERGY SOURCES

## SUSTAINABLE MOBILITY

Energy-efficient vehicles: In 2022, Grupo EULEN has 400 vehicles that use this type of energy: electric, hybrid, autogas or LPG, compared to 198 in 2021.

Sustainable machinery: this investment, as has been the case since 2018, continues to be the Group's main environmental investment, accounting for 56% of total investments in 2022.

Analysis of trends in energy consumption in vehicles and machinery:

- Very positive results in diesel consumption in vehicles, which will have an impact on the Group's carbon footprint indicator in 2021, as shown in the following section of this report.
- Decrease in diesel consumption in vehicles of 0.39% compared to 2021.
- With regard to the consumption of other types of less polluting energies, such as LPG, there was also a 20% and 75% decrease in vehicles and machinery, respectively.

## OVERALL ENERGY CONSUMPTION OF VEHICLES AND MACHINERY (IN MWh)

06 Strategy for sustainable development

Paper

Sustainability is a core value that guides all our operations and decisions. In line with this commitment, we are taking concrete steps to reduce our environmental impact, including the implementation of paper-saving strategies and a commitment to digitalization.

For this reason, at Grupo EULEN we are working to reduce our paper consumption, through measures such as double-sided printing and reducing the amount of paper used in our offices. We are also promoting the use of digital formats in our internal and external communication.

At Grupo EULEN, we believe that the commitment to digitalization and paper savings are essential measures to ensure the sustainability of our company and contribute to the care of the planet. For this reason, we continue to work along these lines and seek new ways to improve our practices and reduce our environmental impact.

COMMITMENT TO DIGITALIZATION

Digitalization also allows us to optimize our processes and improve our efficiency, which in turn enables us to offer better products and services to our customers. In 2022, following the same trend as in previous years, the decrease in this indicator compared to 2021 (3%) is noteworthy.

Water

At Grupo EULEN, we are committed to sustainability and environmental protection. For this reason, responsible water management is an issue that concerns us and on which we are constantly working. We are aware that access to clean and sufficient water is a global challenge, and that proper management of this resource is essential to ensure its long-term availability.

For that reason, at Grupo EULEN we strive to optimize the use of water in our facilities, implementing measures to reduce its consumption, guaranteeing its discharge to municipal sanitation networks.

In 2022, there will be a slight increase in the consumption of this resource.

## Circular Economy

The circular economy is an essential aspect in the move towards decarbonization of the value chain. Optimization in the use of the resources we employ, efficiency and the extension of product life cycles are fundamental principles for Grupo EULEN.

The aim is to transform the concept of waste, so that it is considered a valuable resource that can be recovered and reintroduced as raw material in production systems to maximize its useful life and minimize its environmental impact. In this way, we seek to reduce the extraction of natural resources, the emission of greenhouse gases and environmental pollution. By transforming waste into resources and closing material cycles, it is possible to achieve a more efficient use of resources and reduce the environmental footprint.

### TOWARDS ZERO WASTE

The company's main strategy, in line with its commitment to the circular economy and sustainability, is to achieve zero waste through waste prevention and recovery (reuse, recycling or energy recovery). A system for separating waste into different categories has been established to facilitate recycling.

In 2022, practically all of the waste generated was sent for recycling, 99.53%.

## EU ECOLABEL certificate

In 2022, Grupo EULEN was the first major company in Spain to obtain the EU Ecolabel, a recognition of its commitment to sustainability and the environment. This label is awarded to companies and products that meet the high environmental standards set by the EU.

This certificate has been obtained for the interior cleaning services provided by Eulen Limpieza Circular.

Among the measures implemented by Grupo EULEN are the reduction of energy and water consumption, the optimization of production processes and the elimination of toxic substances in the products and services offered.

Furthermore, it has demonstrated its commitment to transparency and continuous improvement by undergoing periodic evaluations and publishing annual reports on its environmental performance.

Obtaining the EU Ecolabel not only demonstrates the Group's commitment to sustainability, but also enables it to differentiate itself from its competitors and enhance its reputation among consumers and customers who value sustainability and environmental responsibility.

This achievement is part of the Group's roadmap in its strategy towards a circular economy and decarbonization, the main axes of the Sustainability Master Plan.

06 Strategy for sustainable development

Waste generated (t):	2020	2021	2022
	2,701	3,249	4,297

As shown in the graph, the main waste generated is non-hazardous waste, which accounts for 98% of total waste: pruning and mowing waste, construction and demolition debris, mixed packaging, wood and plastic. Practically all of the waste generated was sent for recycling, 99.53%.

The main lines of action on which we are continuing to work in 2022 are:

- Reuse of plant waste: despite being the main waste generated by the company (59% of total waste), new technologies are used, such as bio-chipper machinery with LPG fuel to minimize plant waste and reincorporate it into the soil.
- Reduction of packaging: in the chemical product section, in 2022 the company spends €500,000 on environmentally friendly and concentrated chemicals, accounting for 42% of total environmental expenditure. Meanwhile, the use of sustainable cleaning machinery (the Group's main investment in environmental matters, accounting for 56% of total investments in 2022), which allows optimization of the doses of chemical products used.
- Reduction of lighting waste: the installation of energy-saving lights and motion detectors in our offices has a direct impact on the generation of fluorescent waste.

Environmental training and awareness

We believe that continuous training and awareness-raising of our staff is a primordial and necessary action to achieve our objective of optimizing resources in our activities.

Training in sustainable development: in 2022, 1,197 structural employees received this type of training. Training in environmental awareness and sensitization of the Group: this year, we have ensured that practically all of the Group's 2,300 structural staff are trained in this area, since its implementation in 2010.

In 2022, there have been no environmental emergencies in which we have acted according to our instructions, managing to minimize the environmental impact they could have caused.

Environmental Contingencies	2020	2021	2022
Number of significant spills	0	0	0
Volume of significant spills (m3)	0	0	0

# Co-responsibility and transparency

The services provided by Grupo EULEN have a positive impact on society. The company is an agent of change whose objective, among others, is to improve the quality of public and private services, being jointly responsible for this impact together with its suppliers and customers.

As part of the positive impact, Grupo EULEN makes a direct contribution to the economic and social development of all the communities where it operates, becoming an important economic and social agent of change.

Grupo EULEN shows a formal commitment to tax and social matters in all the jurisdictions in which it operates, this commitment being manifest in the group's contribution to society, with a social contribution in 2022 of 268 million Euros and a total tax contribution in 2022 of 327 million Euros (see details below).

Grupo EULEN follows Principles based on business excellence, adopting, as part of its values, an attitude of dialogue and transparency towards all stakeholders, aligning our model with ethical and social commitments and promoting, at all times, responsible taxation.

Grupo EULEN's compliance with its social and tax obligations and its relations with the social and tax authorities are based on pillars such as integrity, prudence and transparency, which is why Grupo EULEN has implemented internal procedures, action protocols and technological tools, with the aim of controlling and minimizing the social and tax risk of its businesses.

Grupo EULEN also makes a major effort to train all its employees on the social and tax implications of the services provided in each of its different lines of business, considering this action to be a fundamental tool for detecting and minimizing the associated risks.

LINES OF ACTION	2022 MILESTONES	SDGS
CO-RESPONSIBILITY AND TRANSPARENCY	Grupo EULEN makes a direct contribution to the economic and social development of all the communities where it operates, becoming an important economic and social agent of change.	

## Global contribution: fiscal and social

### Fiscal

The Group pays taxes on the profits obtained in the markets in which it operates, complying with each of the tax obligations of the different jurisdictions, being responsible for the correct management and collection of all of them.

In addition, Grupo EULEN, as an agent in the generation of high-quality employment, collects a total of 81 million Euros on behalf of the employees and quality professionals it hires. These amounts are paid into the public coffers of each competent body in the local jurisdictions.

By geographical area, 98.57% of the taxes paid by Grupo EULEN in 2022 were paid to the Spanish Treasury, a percentage that is higher than the proportion of the company's overall turnover that is accounted for by Spain.

EMEA is the main territory in which it operates and with the highest sales volume, representing a tax contribution of 85.78% of its total worldwide contribution, with a percentage of 14.22% attributed to activities carried out in American jurisdictions.

	Year 2022 (in thousands of Euros)				
	Corporate Income Tax (CIT)	Taxation on Services (VAT)	Other taxes	Total global contribution	% Total global contribution
EMEA (Spain and Portugal)	€5,572.	€201,477	€73,667	€280,716	85.78%
AMERICA €	€5,302	€26,791	€14,444	€46,538	14.22%
TOTAL	€10,874	€228,268	€88,111	€327,254	100.00%

(\*) Includes: Amount withheld from workers and professionals; Business tax; Real estate tax; Fees.

## Social

Grupo EULEN, as an agent generating employment, pays and collects, on its own behalf (268 million Euros) and on behalf of its employees (79 million Euros), a total of 347 million Euros. These amounts are paid into the public coffers of each competent body in the local jurisdictions and/or those entities that cover the social obligations corresponding to the generation of employment.

	Year 2022 (in thousands of Euros)		
	Corporate social contributions	Employee social contributions	Total social contributions
EMEA	€243,532	€54,975	€298,507
AMERICA	€24,537	€24,740	€49,277
TOTAL	€268,069	€79,715	€347,784

# Contribution to the community

Grupo EULEN is firmly committed to the development of social initiatives that help to positively influence the development of the environment and communities, especially in the geographical areas in which it operates.

Given our activity and values, the company is aware of its role as an employer and diligently assumes responsibility for the fulfillment of the Sustainable Development Goals (SDGs) in the implementation of its different lines of action and social commitment.

LINES OF ACTION	2022 MILESTONES	SDGS
LABOR INTEGRATION AND TRAINING FOR PEOPLE AT RISK OF EXCLUSION	<ul style="list-style-type: none"><li>Many of the social projects supported by Grupo EULEN seek to indirectly reduce poverty through the creation of jobs and opportunities for all people, with special attention to groups of high vulnerability and at risk of exclusion.</li><li>People are a priority for Grupo EULEN. The Group develops multiple programs in all countries promoting employment contracts that improve the conditions established in the applicable regulations and legislation. This way, the employee has all the benefits guaranteed by the social structure of each country.</li><li>Grupo EULEN participates in partnerships in order to achieve synergies between the different agents with which it interacts in the development of its activity. The objective of these partnerships is to adopt measures to guarantee the fulfilment of the Sustainable Development Goals.</li></ul>	<div><div><div>1</div><div>FIN DE LA POBREZA</div><div></div></div><div><div>8</div><div>TRABAJO DECENTE Y CRECIMIENTO ECONÓMICO</div><div></div></div></div> <div><div>17</div><div>ALIANZAS PARA LIDERAR LOS OBJETIVOS</div><div></div></div>
SUPPORT TO FAMILIES, CHILDREN, ELDERLY PEOPLE AND VULNERABLE GROUPS	<ul style="list-style-type: none"><li>Grupo EULEN focuses its efforts on the reduction of inequality, generating employment in groups at risk of exclusion, allowing them to provide a decent way of life through work.</li><li>The majority of the people who work at Grupo EULEN are women, and the Group's equality policies are focused on all levels of the company.</li><li>Grupo EULEN wishes to raise awareness among its employees in the fight against hunger and malnutrition of people in need, through initiatives with organisations that want to combat the lack of food and water in disadvantaged communities.</li></ul>	<div><div><div>2</div><div>HAMBRE CERO</div><div></div></div><div><div>5</div><div>IGUALDAD DE GÉNERO</div><div></div></div></div> <div><div>10</div><div>REDUCCIÓN DE LAS DESIGUALDADES</div><div></div></div> <div><div>12</div><div>PRODUCCIÓN Y CONSUMO RESPONSABLE</div><div></div></div>

# Investment in the community

Our investment in the community exceeded €855,603 in 2022. We developed 551 social initiatives and collaborated with 485 organizations or associations with social purposes.

The investment model in the community revolves around three main lines of action on which the company focuses its efforts: labor integration and training for people at risk of exclusion, support for families, children, the elderly and vulnerable groups, and finally, the promotion of culture, education, sports and environmental protection.

## COMMITMENT TO SOCIETY

Labour integration and training of people at risk of social exclusion.

Promotion of culture, education, sports and environmental protection

Support to families, children, elderly people and vulnerable groups

**Labor integration and training of people at risk of exclusion:** we maintain a clear commitment to the most disadvantaged groups, whether they are people with disabilities, migrants, people at risk of social exclusion, young people or the elderly unemployed. The company currently collaborates and has agreements with more than 396 organizations that work for the reintegration and comprehensive development of these groups at risk of exclusion.

**Support for families, children, the elderly and vulnerable groups:** we collaborate with multiple non-profit associations and foundations (in 2022 there were a total of 53 organizations), by supporting social projects that aim to improve the conditions of the communities where the company carries out its activities.

**Promotion of culture, education, sports and environmental protection:** we firmly believe that culture defines the identity traits of society and its promotion allows us to move forward in strengthening its values. For this reason, we allocate economic resources and show our commitment through the establishment of partnerships in the promotion of local culture, education and sports and environmental protection. In 2022, it partnered up with a total of 57 organizations.

Resources allocated to Social Action	2022	2021	2020
Investment/expenditure in Euros	855,603	828,978	714,412

In accordance with the purposes of the social action, the distribution of social programs carried out in 2020 is detailed below: (1) Labor integration, (2) promotion of culture, education, sports and environmental protection, and (3) assistance to families, children, the elderly and vulnerable groups.

- (1) Labor integration
- (2) Promotion of culture, education, sports and environmental protection
- (3) Help to families, children, elderly people and vulnerable groups

Key programs

Labor integration and training of people at risk of social exclusion

EULEN Chile

Fundación Descubreme; Instituto de Rehabilitación Teletón; Coanil; Omil; Kosmo Fundación

Collaboration projects with these organizations for the labor inclusion of people with disabilities.

EULEN Costa Rica

Fundación Mujer

Collaboration projects with these organizations for the inclusion of people with disabilities in the labor market.

EULEN Peru

Cámara Oficial de Comercio de España en el Perú

Labor integration project for women victims of violence.

Support to families, children, the elderly and vulnerable groups

EULEN Spain

During the year 2022, Fundación David Álvarez-EULEN carried out several social initiatives, among which we would highlight:

Project to help various soup kitchens in Spain: Hijas Caridad – Madrid; San Juan de Dios – Sevilla; La cocina económica – A Coruña; Ave María – Madrid; San Juan de Dios – Palma; Fundación Roure –León.

The objectives of these soup kitchens are: provision of basic food coverage, coverage of basic housing needs, promotion and integration of the most disadvantaged groups and normalized integration of migrant individuals and families at risk.

EULEN Colombia

“Construyendo Futuro EULEN-Colombia”

Since 2021, Fundación David Álvarez – EULEN has run the educational project “Construyendo Futuro EULEN-Colombia” where 15 scholarships are awarded to people who work at Grupo EULEN so that they can continue their academic training.

To this end, the Foundation has signed a collaboration agreement with Colegio Capacitación 2000, an institution specializing in youth and adult education, approved by the Secretariat of Education of Colombia. In this way, we contribute to the education of our employees, adding value as a socially responsible company.

Culture, research, education and local sports

EULEN Mexico

Banco de Tapitas A.C

Project for the collection of plastic lids to help associations of children with cancer.

EULEN Colombia

Asociación de Recicladores Puerta de Oro

Recycling project to recover recyclable waste and donation of work clothes without logos.

EULEN Portugal

Associação portuguesa de apoio à mulher com cancro da mama

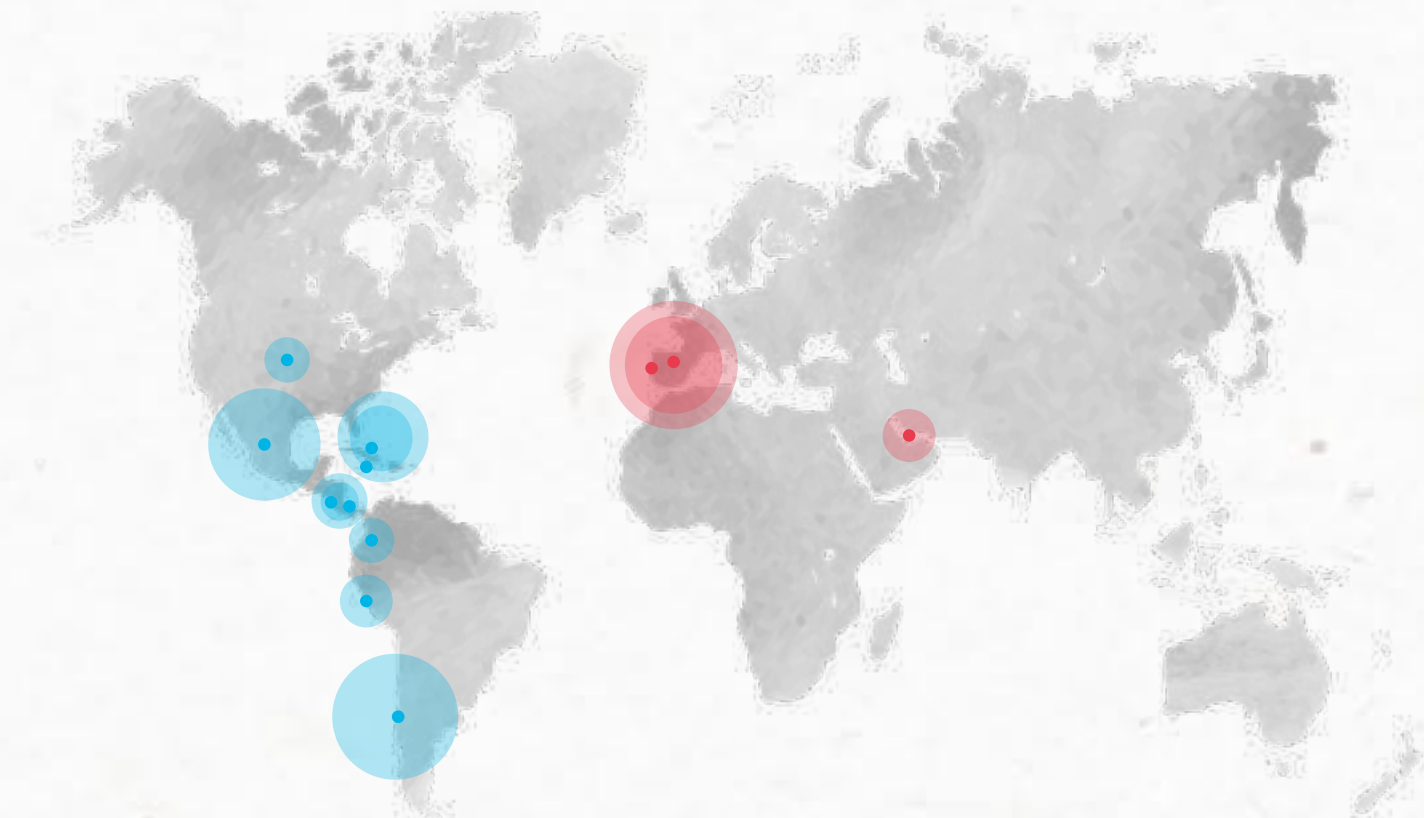

Collaboration project with this association dedicated to raising awareness among as many women as possible about the importance of prevention and early detection of breast cancer.

EULEN Panama

Fundación Don Juan Bosco

Project to support security services in this Foundation dedicated to people with Down syndrome.

## Independent Assurance Report on the Sustainability Report of Eulen S.A. for 2022

(Translation from the original in Spanish. In case of discrepancy, the Spanish language version prevails.)

To Management of Eulen, S.A.,

We were engaged by the Board of Directors of Eulen S.A. (hereinafter the Company) to provide limited assurance on the Sustainability Report for the year ended 31 December 2022 (hereinafter “the Report”). The revised information is limited to the information of Eulen S.A. included in the Annex "GRI Content Index" of the Report.

### Responsibility of Eulen, S.A.’s Management

Eulen S.A.’s management is responsible for the preparation and presentation of the Report in accordance with the Sustainability Reporting Standards of the Global Reporting Initiative (GRI Standards), in its comprehensive option, of the Global Reporting Initiative, as described in the GRI Content Index of the Report.

Management is also responsible for the information and assertions contained within the report; for determining Eulen S.A.’s objectives in respect of the selection and presentation of sustainable development performance, including the identification of stakeholders and material issues; and for establishing and maintaining appropriate performance management and internal control systems from which the reported performance information is derived.

This responsibility also encompasses the establishment of controls deemed necessary by Management to enable that the preparation of indicators with a limited assurance review is free from material misstatement, whether due to fraud or error.

### Our responsibility

Our responsibility is to carry out a limited assurance review and to express a conclusion based on the work performed. We conducted our engagement in accordance with International Standard on Assurance Engagements ISAE 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standard Board (IAASB); and with the guidelines on the revision of Corporate Responsibility Reports issued by the Spanish Institute of Registered Auditors (ICJCE). These standards require that we plan and perform the engagement to obtain limited assurance about whether the Report is free from material misstatements.

(Translation from the original in Spanish. In case of discrepancy, the Spanish language version prevails.)

Our firm applies International Standard on Quality Management 1 (ISQM1), which requires us to design, implement and maintain a system of quality management, including policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including international independence standards) issued by the Internal Ethics Standards Board for Accountants (IESBA), which is based on the fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

### Procedures performed

Our limited assurance engagement has been carried out by means of enquiries of management and persons responsible for the preparation of information presented in the Report, and the application of analytical and other evidence gathering procedures. These procedures included:

- Verification of Group’s processes for determining the material issues, and the stakeholder participation therein.
- Verification, through interviews with management and relevant staff at group level and selected business unit level, of the presence of sustainability strategy and policies and corporate responsibility to attend to material issues, and the implementation of these across the business of Group.
- Assessment of the consistency of the description of the application of Group’s policies and strategy on sustainability, governance, ethics and integrity.
- Risk analysis, including searching the media to identify material issues during the year covered by the Report.
- Review of consistency of information comparing the Universal Standards with internal systems and documentation.
- Analysis of the processes of compiling and internal control over quantitative data reflected in the Report, regarding the reliability of the information, by using analytical procedures and review testing based on sampling.
- Review of the application of the Sustainability Reporting Standards of the Global Reporting Initiative (GRI Standards) requirements, in accordance with comprehensive option.
- Reading the information presented in the Report to determine whether it is in line with our overall knowledge of, and experience with, the sustainability performance of Group.
- Comparison between the financial information presented in the Report and those included in Group’s Annual Accounts audited by independent third parties.
- Procurement of a representation letter from the Directors and management.

Our multidisciplinary team included specialists in dialogue with stakeholders, and social, environmental and economic business performance

(Translation from the original in Spanish. In case of discrepancy, the Spanish language version prevails.)

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less wide than a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is lower than that of a reasonable assurance engagement. This report may not be taken as an auditor’s report.

### Conclusions

Our conclusion has been formed on the basis of, and is subject to, the matters outlined in this Independent Assurance Report.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our conclusions.

Based on the procedures performed and the evidence obtained, nothing has come to our attention that causes us to believe that the Report has not prepared, in all material respects, in accordance with the Sustainability Reporting Standards of Global Reporting Initiative (GRI Standards), as described in the GRI content Index of the Report, including the reliability of data, adequacy of the reported information and the absence of significant deviations and omissions.

### Purpose of our report

In accordance with the terms of our engagement, this Independent Assurance Report has been prepared for Eulen S.A. in relation to its Sustainability Report and for no other purpose or in any other context.

Under separate cover, we will provide Eulen S.A.’s management with an internal report outlining our complete findings and areas for improvement.

KPMG Asesores, S.L.

# GRI Content Index

(2: 2-7, 3-1,2-4, 3-2)

This report has been prepared in accordance with GRI Standards. Grupo EULEN has been a member of the United Nations Global Compact since 2002. The GRI Index of this SR, which also serves as a Progress Report on the 10 principles of the Global Compact, indicates the different parts of the document that relate to each of the Global Compact Principles.

The following reporting principles contained in the GRI 2 General Disclosures 2021 standard have been used to establish the content of the report:

- Participation of Stakeholders: Grupo EULEN identifies and maintains a constant dialogue with stakeholders in order to be able to subsequently describe how it responds to their expectations and interests.
- Sustainability context: Grupo EULEN contributes, or intends to contribute in the future, to the improvement of economic, environmental and social trends, progress and conditions at a local, regional or global level, all of which are interconnected.
- Materiality: Grupo EULEN intends to focus the SR on those topics and contents that reflect the most significant social, environmental and economic impacts of the organization or those that could have a substantial influence on the assessments and decisions of its stakeholders. In this regard, the company conducts an annual materiality assessment.
- Completeness: The coverage of the material topics that Grupo EULEN handles and the definition of the coverage of the information must be sufficient to reflect the significant social, economic and environmental impacts and to allow stakeholders to assess the Group's performance during the year.

A selection of GRI content identified in the materiality assessment has been reviewed by KPMG Asesores, S.L., in accordance with the requirements established in the International Standard on Assurance Engagements 3000 in force, Assurance Engagements other than Audits and Reviews of Historical Financial Information" (NIEA 3000 Revised) issued by the International Auditing and Assurance Standards Board

(IAASB) of the International Federation of Accountants (IFAC) and with the Performance Guide on Assurance Engagements on Non-Financial Information issued by the Instituto de Censores Jurados de Cuentas de España (ICJCE). Said content can be found in the GRI index highlighted with the following symbol: ✓

## United Nations Global Compact Principles

- Principle 1.** Businesses should support and respect the protection of internationally proclaimed human rights within their sphere of influence.
- Principle 2.** Businesses should make sure that they are not complicit in human rights abuses.
- Principle 3.** Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining.
- Principle 4.** Businesses should uphold the elimination of all forms of forced and compulsory labor.
- Principle 5.** Businesses should uphold the effective abolition of child labor.
- Principle 6.** Businesses should uphold the elimination of discrimination in respect of employment and occupation.
- Principle 7.** Businesses should support a precautionary approach to environmental challenges.
- Principle 8.** Businesses should undertake initiatives to promote greater environmental responsibility.
- Principle 9.** Businesses should encourage the development and diffusion of environmentally friendly technologies.
- Principle 10.** Businesses should work against corruption in all its forms, including extortion and bribery.

# GRI Content Index

Grupo EULEN has prepared the report in accordance with the GRI Standards for the period from 01/01/2022 to 31/12/2022.

2023

For the Content Index - Essentials Service, GRI Services reviewed that the GRI Content Index is clearly presented, consistent with the Standards, and that the references for contents 2-1 to 2-5, 3-1 and 3-2 are aligned with the corresponding sections in the body of the report. The service was performed on the Spanish version of the report.
